

# Laws of Indices

Laws of indices provide us with rules for simplifying calculations or expressions involving powers of the same base. They are:

$$a^m \times a^n = a^{m+n}$$

$$a^m \div a^n = a^{m-n}$$

$$a^0 = 1$$

$$(a^m)^n = a^{m \times n} = a^{mn}$$

$$a^{-m} = \frac{1}{a^m}$$

$$a^{\frac{m}{n}} = \sqrt[n]{a^m}$$

## Using Laws:

Law and Social Solidarity in Contemporary China Han Peng, 2020-12-29 This book adopts Durkheim's legal perspective to treat law as a symbol of social solidarities to examine Chinese society. The work analyzes changes in the nature of social solidarity from observing changes in laws, thus drawing together western socio-legal theory and distinctive Chinese conditions. It draws on Durkheim's theoretical framework and methodology to develop a more comprehensive understanding of the role of law using theories of others such as Habermas and by taking into account the discussion of power and the conflicts of interests in analyzing key social features during transition. The analysis of social anomie in terms of the changes of juridical rules as well as the changes in the nature of social solidarity provides an inspiring perspective to look into contemporary social problems. The book will be essential reading for researchers and academics working in the areas of socio-legal studies, legal theory, and law and society in China. *In-law Relationships* Geoffrey L. Greif, Michael E. Woolley, 2021 Drawing from original research survey data and interviews, *In-law Relationships* explores the complex relationships between and among married couples and their in-laws. *Mining Law and Governance in Africa* Victoria R. Nalule, 2023-06-09 This book explores the various issues that characterise the African mining sector, drawing examples from different African countries and regional organisations. Although there is a massive literature on the subject, some issues have been neglected, including the crucial role of digitalisation and technological advancement in resolving the environmental and social challenges faced in Artisanal and Small Scale Mining (ASM), deep sea mining, mining contract negotiations, and modernising mining laws to reflect the increasing role of critical minerals, to mention but a few. Therefore, the book unpacks the critical issues associated with the mining sector, explicitly reflecting on the practical solutions needed to address the challenges in the African mining sector. This book uniquely analyses and adds flavour to international mining's fundamental concepts by describing a simulated annealing-based approach appropriate for complex mining projects in Africa. Book contributors comprise academics from different universities, including professors, practitioners, government policymakers, NGO executives, and a variety of different experts. This multidisciplinary book will be of interest to African policymakers, governments, academics, industry professionals, energy and mining institutions, international organisations, universities across the globe, and companies. **Mothers-in-Law and Daughters-in-Law** Deborah M. Merrill, 2007-09-30 We all know we have perhaps told a few stories about mothers-in-law and daughters-in-law. It seems the stories are nearly always about relationships filled with conflict and abrasive words or actions. But why is this relationship so difficult? And is it always as bad as popular belief would have us think? Deborah Merrill, a woman's advocate and Sociology professor at one of our nation's top universities, has been studying the relationship for nearly a decade, and in this book explains where the difficulty is rooted, how friendly pairs have made it past problems that surface between a man's mother and his wife, and how they became friends. Dozens of interviews with pairs of women made in-laws by marriage illustrate Merrill's points from harmful ideas and

actions to helpful approaches At its core this book holds that marriage requires the creation of a new and separate family which requires changes in roles as well as a redefinition of relationships Hence family boundaries need to be made permeable to allow for integration of the daughter in law and to allow the son to create his own separate and autonomous family Family members need to be aware of and prepare for this says Merrill That of course may be easier said than done But dozens of women who have become friends with their in laws some so much so that they drop the in law and just call each other mother and daughter explain how they got past the old popular notions and social structure to create goodwill and grow stronger families The Revised Statutes, Codes and General Laws of the State of New York New York (State),1901
