Subject Analysis Principles And Procedures:

Introduction to Cataloging and Classification Daniel N. Joudrey, Arlene G. Taylor, David P. Miller, 2015-09-29 A new edition of this best selling textbook reintroduces the topic of library cataloging from a fresh modern perspective Not many books merit an eleventh edition but this popular text does Newly updated Introduction to Cataloging and Classification provides an introduction to descriptive cataloging based on contemporary standards explaining the basic tenets to readers without previous experience as well as to those who merely want a better understanding of the process as it exists today The text opens with the foundations of cataloging then moves to specific details and subject matter such as Functional Requirements for Bibliographic Records FRBR Functional Requirements for Authority Data FRAD the International Cataloging Principles ICP and RDA Unlike other texts the book doesn't presume a close familiarity with the MARC bibliographic or authorities formats ALA's Anglo American Cataloging Rules 2nd Edition revised AACR2R or the International Standard Bibliographic Description ISBD Subject access to library materials is covered in sufficient depth to make the reader comfortable with the principles and practices of subject cataloging and classification In addition the book introduces MARC BIBFRAME and other approaches used to communicate and display bibliographic data Discussions of formatting presentation and administrative issues complete the book questions useful for review and study appear at the end of each chapter

Subject Analysis Derek Wilton Langridge, 1989 Education for Cataloging and the Organization of Information Janet Swan Hill, 2014-04-23 What does the future hold for cataloging education Written by some of the best known authors and most innovative thinkers in the field including Michael Gorman Sheila S Intner and Jerry D Saye this comprehensive collection examines education for students and working librarians in cataloging and bibliographic control emphasizing history context the state of the art at present and suggested future directions A liberal dose of visual aids charts tables etc makes accessing the information quick and easy From the editor The education of catalogers has swung pendulum like from on the job training to graduate education and back again The place of cataloging in the library school curriculum has swung from one of near pre eminence to one of near extinction and has begun to swing back again The durability of education for cataloging has swung from In getting your degree you will learn everything you need to know in your career to You will have to engage in continuing education throughout your career beginning virtually as soon as you have your degree Making informed decisions about how and how much cataloging education is to be provided is full of pitfalls some of which the profession has fallen into already What is needed now is a reconsideration of how education for cataloging and bibliographic control is provided Education for Cataloging and the Organization of Information Pitfalls and the Pendulum addresses four main areas the ways professionals perceive the place nature and necessity of cataloging education the professional demographic and academic context within which cataloging education is provided education regarding special types of materials and special aspects of cataloging and alternatives to traditional modes of education for cataloging including
