**Handbook of Clinical Toxicology of Animal Venoms and Poisons** Julian White, Jurg Meier, 2017-11-22 The Handbook of Clinical Toxicology of Animal Venoms is the first concise one volume book devoted to this important subject The editors are internationally recognized authorities in the biology and clinical aspects of venomous and poisonous animals and the chapter authors are world leaders in their respective fields of toxicology All aspects of the topic are covered including information on the biology and taxonomy of poisonous animals their venom or poison diagnosis and general treatment principles and specific treatment The most up to date list of available antivenoms is provided Coverage of

venomous and poisonous animals is comprehensive with thorough discussions on shellfish poisoning ciguatera fugu coelenterates stingrays venous fish blue ringed octopus sea snakes scorpions spiders insects and gila lizards Individual chapters focus on snakes and snakebite in Europe Africa Asia Australia North America Central America and South America Nearly all clinical chapters have been written by clinicians with extensive experience treating the particular type of animal envenoming or poisoning under consideration No other book brings together such a wealth of information in this field and no other book provides it in a format useful to clinicians charged with the responsibility of treating envenomed or poisoned patients The Handbook of Clinical Toxicology of Animal Venoms is an essential addition to all medical libraries emergency departments toxicology departments poison information centers and invaluable to all professionals working in these fields

**Arthropod Venoms** S. Bettini, 2013-03-13 Arthropod venoms have received much attention and have played an important role in folklore and medicine since ancient times Scorpion envenomation tarantism bee and wasp stings are among those subjects about which most has been speculated and written in the past In the last 50 years or so a great number of scientific papers have been devoted to arthropod venoms but only a few volumes have been designed to collect this rapidly increasing material and these are not recent Of late the chemistry and mode of action of several arthropod venoms have been thoroughly studied and some of these substances will probably be used as pharmacological tools and also as therapeutic agents The aim of the present volume is to collect in manual form new information as well as the old notions on arthropod venoms Even though it was our intention to present a volume on arthropod venoms and not on venomous arthropods inevitably we were forced to include information on venom producing organisms as well We assumed in fact that those scientists for whom the present manual is primarily intended biochemists particularly comparative biochemists and pharmacologists should be familiar with the biologic elements concerning the venom producing species which should show them how important it is to operate in close collaboration with biologists specialized in venomous arthropod systematics and biology

*ACCCN's Critical Care Nursing* Doug Elliott, Leanne Aitken, Wendy Chaboyer, Andrea Marshall, 2007 Developed in conjunction with the Australian College of Critical Care Nurses ACCCN the text has been written and edited by the most senior and experienced critical care nursing clinicians and academics across the region ACCCN's Critical Care Nursing is a resource that will foster the development of skilled and confident critical care nurses This comprehensive text provides detailed coverage of a number of specialty areas within critical care nursing including intensive care emergency nursing cardiac nursing neuroscience nursing and acute care It will encourage students to be reflective practitioners ethical decision makers and providers of evidence based care Written by expert clinicians academics and educators Pedagogically rich chapters with learning objectives key terms case studies practice tips article abstracts learning activities research vignettes Heavily illustrated and referenced Reflects current clinical practice policies procedures and guidelines The text has a patient centred approach and will provide students with a sound knowledge base and critical thinking skills Image bank of all
