TEACHING OF NURSING**

**TEACHING NURSING IN AN
ASSOCIATE DEGREE PROGRAM**

RITA G. MERTIG

This practical "how to" book for teaching nursing in an associate degree program is for new and not-so-new faculty. Advice gathered from the author's many years of teaching is presented in a friendly and easy-to-read format, designed to quickly help new faculty get a positive sense of direction. The special issues of Associate Degree nursing students—many have families, full-time jobs, and are more mature than the "traditional" college student—are given full consideration.

"Content is presented in a straightforward manner... covers the most significant topics central to entry-level nursing education."

—From the Foreword by **Joyce Fitzpatrick, PhD, RN, FAAN**

The Origins and Rise of Associate Degree Nursing Education Patricia T. Haase, 1990 The Origins and Rise of Associate Degree Nursing Education offers an analytical history of the beginnings and development of associate degree nursing ADN programs and the role of the caregivers it produces in the health care system Nurses may be trained in two three or four year programs but all are eligible to take the accreditation examination to be licensed as registered nurses RNs The question of distinguishing between professional nurses from bachelor programs and technical nurses from the associate degree programs has become an important and controversial issue in nursing Advocates have long contended that the associate degree nurse is vital to the American health care system This study funded by the W K Kellogg Foundation confirms this view In recent years the Foundation has invested more than 6.1 million in the development of the ADN awarded by junior and community colleges Many participants in the ADN projects for the Kellogg Foundation have noted that despite the importance of the ADN and the controversy about its place in nursing education the literature is scattered and hard to identify The Origins and Rise of Associate Degree Nursing Education and the companion bibliography will provide much needed information to educators hospital and nursing administrators nursing leaders and public policy makers all of whom must cope with the growing nursing shortage and increasingly difficult issues in health policy and administration
