in a Digital World Marcus Fontoura,2025-12-23 This may be the first true AI era self help book not because we need help using technology but because we need help using it well It s about building the knowledge and the confidence to question to evaluate to choose Because understanding how algorithms work is the first step in making sure they work for us Human Agency in a Digital World is a book about reclaiming our role not as passengers but as pilots in the fast moving journey of technological change Written by a computer scientist who is also a father a teacher and a lifelong student of how things work this book is a deeply personal and accessible guide to the systems shaping our lives and how we might shape them back We are surrounded by digital agents They suggest the next song answer our questions sort our emails recommend what to watch and often invisibly shape what we think But what do we know about them And how much power do we really have to question understand or even redirect their impact In this book Marcus Fontoura explores the hidden architectures of modern life from social media and search engines to cloud computing AI and quantum technologies uncovering both how they work and what they mean Drawing from decades of experience building the backbone of the internet and cloud platforms he demystifies the core concepts that govern today s systems and offers readers a way to develop digital fluency without needing a computer science degree But this is not just a book about machines It s a book about people about how we use efficiency not just to optimize for speed or cost but to unlock creativity opportunity and well being With examples ranging from broken playlists to protein folding and reflections that move fluidly between systems thinking and everyday life Digital Agency asks us to consider a simple but profound question what do we want technology to do for us and what will we do with it in return

Digital International Relations Corneliu Bjola,Markus Kornprobst,2023-11-03 This book analyses how digital transformation disrupts established patterns of world politics moving International Relations IR increasingly towards Digital International Relations This volume examines technological agential and ordering processes that explain this fundamental change The contributors trace how digital disruption changes the international world we live in ranging from security to

economics from human rights advocacy to deep fakes and from diplomacy to international law The book makes two sets of contributions First it shows that the ongoing digital revolution profoundly changes every major dimension of international politics Second focusing on the interplay of technology agency and order it provides a framework for explaining these changes The book also provides a map for adjusting the study of international politics to studying International Relations making a case for upgrading augmenting and rewiring the discipline Theory follows practice in International Relations but if the discipline wants to be able to meaningfully analyse the present and come up with plausible scenarios for the future it must not lag too far behind major transformations of the world that it studies This book facilitates that theoretical journey This book will be of much interest to students of cyber politics politics and technology and International Relations *The Great Digital Transformation* D.
