

# WAR AGAINST WAR

We the people call on all governments to acknowledge the necessity to end war and ask for their support in achieving peace through non-violence.

Millions of people have been killed in wars since 1945, yet none of these conflicts have led to lasting peace globally. We need to embrace a new approach focused on non-violence at its core.

## WAR.CX

INDEPENDENTLY PRINTED — MAKE PEACE, NOT WAR

Individuals can collectively impact this process through the creation of art focused on creating peace and ending wars.

War is simply not the answer to any of the issues we face globally and we ask for your support in ending wars by advocating for peace at any chance you get. Ending war is possible, but it takes everyone's support all the time. Making art, music, food, and promoting other cultures allows a space for dialogue about what it might take to end war globally through non-violent means. Use your community spaces for dialogue to focus on strategies for ending war and creating peace for all.

Together we have the power to make the world a better place within our lifetime.

**Primordial Violence: German War On The Soviet Partisans** Major Gus Kostas USMCR,2014-08-15 In terms of Clausewitz paradoxical trinity the German counter insurgency in the occupied territories of the Soviet Union 1941 1944 did not achieve a sense of balance The second two legs of the trinity the play of chance and probability and the element of subordination were subverted by primordial violence and enmity Clausewitz offers his paradoxical trinity as a viable framework for analyzing the inherent complexities of warfare The three interdependent dynamic aspects of the trinity must be balanced against each other if a successful plan for war is to prevail Additionally Clausewitz addresses the dynamics of insurgencies and counter insurgencies With these two analytical frameworks an examination of a specific campaign becomes plausible The German efforts to thwart the partisan uprising in the occupied territories of the Eastern Front from 1941 1944 reflected the interplay of the Clausewitz triad Primordial violence was imbued in the German people as a result of National Socialist indoctrination The play of chance and probability reflected the largely successful active and passive measures employed by the German armed forces behind German lines in the east The element of subordination was manifested in the pernicious Nazi policies and directives that inevitably dictated the conduct of the armed forces As a result of Hitler s imbalanced irrational eastern strategy and sequent war on the partisans primordial violence enmity and hatred superseded the other two legs of the trinity Hitler s unlimited political and military objectives ultimately were incompatible with the German Army s ability to pragmatically prosecute the eastern war and pacify the population that supported the partisan resistance

*War in Social Thought* Hans Joas,Wolfgang Knöbl,2012-11-04 A sweeping history of social theories about war and peace from Hobbes to the twenty first century This book the first of its kind provides a sweeping critical history of social theories about war and peace from Hobbes

to the present Distinguished social theorists Hans Joas and Wolfgang Kn bl present both a broad intellectual history and an original argument as they trace the development of thinking about war over more than 350 years from the premodern era to the period of German idealism and the Scottish and French enlightenments and then from the birth of sociology in the nineteenth century through the twentieth century While focusing on social thought the book draws on many disciplines including philosophy anthropology and political science Joas and Kn bl demonstrate the profound difficulties most social thinkers including liberals socialists and those intellectuals who could be regarded as the first sociologists had in coming to terms with the phenomenon of war the most obvious form of large scale social violence With only a few exceptions these thinkers who believed deeply in social progress were unable to account for war because they regarded it as marginal or archaic and on the verge of disappearing This overly optimistic picture of the modern world persisted in social theory even in the twentieth century as most sociologists and social theorists either ignored war and violence in their theoretical work or tried to explain it away The failure of the social sciences and especially sociology to understand war Joas and Kn bl argue must be seen as one of the greatest weaknesses of disciplines that claim to give a convincing diagnosis of our times
