Variability in Early Communicative Development Larry Fenson,1994 Drawing on parent s reports of more than 1 800 children this Monograph describes in detail both typical and exceptional courses of communicative development between the ages of eight and thirty months The authors large dataset offers unusually specific information on the developmentally variable course of individual lexical gestural and grammatical skills The wide variability found among children s acquisition of these skills presents a challenge to the concept of the model child and will intrigue developmental psychologists as well as linguists interested in language acquisition *Preschool Assessment* Marla R. Brassard,Ann E. Boehm,2008-09-16 Education **First Steps to Communication** Manuela Wagner,2006 **Parental Questionnaires as a Reliable Instrument for the Assessment of Child Language Development** Maria-José Ezeizabarrena,Melita Kovacevic,2024-09-13 Language is crucial in child development Therefore general questions such as what are the possible challenges in language acquisition or such as how well the my child is doing are commonly present for researchers clinicians teachers and parents Parent child interaction offers a privileged setting to observe children s behavior in multiple communicative situations which often is only available to the parents caregivers For this reason within the broad range of methods used to assess children s development parental questionnaires are widely used being a non invasive and inexpensive instrument to obtain information which is otherwise difficult to obtain Data obtained with the many questionnaires covering various aspects of child development and communicative competence are equally relevant for basic research and everyday clinical practice Development and use of parental questionnaires as well as data interpretation frequently require an interdisciplinary and cross sector approach bringing together developmental psychologists and practitioners This interdisciplinarity is assumed but rarely addressed directly [New Trends in Typical and Atypical Language Acquisition](#) Eliseo Diez-Itza, Alejandra Auza B.,Victoria Marrero-Aguilar,Eva Aguilar-Mediavilla,2025-03-10 This Research Topic is associated to the AEAL International Congress for the Study of Language Acquisition The triennial AEAL conference is one of the most important scientific events in the field of language acquisition and brings together experts in language acquisition in areas as diverse as grammar lexicon discourse pragmatics psycholinguistics neurolinguistics sociolinguistics and language teaching and education The Association for the Study of Language Acquisition AEAL promotes the study of language acquisition and development both in monolingual and multilingual situations paying special attention to the acquisition of Spanish Basque Catalan and Galician as well as to the relationship of language with psychological social educational and biological processes [Applied Psycholinguistics](#) ,2006 [Remembering the Times of Our Lives](#) Patricia J. Wasik, 2009 Children's speaking reading and writing skills are closely connected and this engaging text guides preservice and practicing teachers in choosing instructional strategies that promote the integrated development of these skills. The authors explore the foundations of language in the developing brain and show how language acquisition in early childhood influences later literacy and language use.
