Learning Disabilities and Brain Function William H. Gaddes, 2013-04-17 Some may say that this book is long overdue others including myself will state that the book appears at just the right time The latter is likely more true for it is doubtful that many in the professions would until now link issues of learning disabilities with those of neurophysiological dysfunction in the manner in which ultimately must be the case As a matter of fact there are those who deny the relationship completely Lee Wiederholt 1974 1 in his short but excellent review of the historical perspectives of learning disabilities traces the early interest in this problem to the work of Gall 1802 and to his successors Broca 1861 Jackson 1864 Bastian 1869 and a few others Each of these men would at the time of this writing be considered to have interests in the field of neurology although at the time of their investigations neurology per se was but a gleam in the eye of the anatomical beholder A relative detour then took place Cerebral palsy in the decades of the 1940s and 1950s caught the attention of researchers through the work of Winthrop Morgan Phelps orthopedist and George Deaver physiatrist and one or two other medically oriented individuals This was related to the writings of W J Little 1810 1894 It was however Kurt Goldstein Heinz Wemer both eminent German scientists and Alfred A

Five Levers to Improve Learning Tony Frontier, James Rickabaugh, 2014-01-08 Why have decades of school reform had so little measurable effect on student achievement Why have billions of dollars spent on technology small school initiatives and school choice options failed to improve our schools Too often educators are simply pulling the wrong levers say Tony Frontier and James Rickabaugh They explain that the various components of schooling fall into five categories structure sample standards strategy and self Understanding how these five levers work and their relative power can help unlock the potential for lasting improvements in teaching and learning The authors show readers that changes to structure and sample how schools are organized and how students are grouped will not be effective without changes to standards expectations for student learning strategy instructional strategies to engage students in meaningful learning and self the set of beliefs teachers and students have about their capacity to be effective At the heart of this book is a simple message for teachers administrators board members and education policymakers at all levels the key to success is not doing more work and making more changes but doing the right work and making the right changes
