## Strange Loop:

**The Strange Loops of Translation** Douglas Robinson, 2021-12-16 One of the most exciting theories to emerge from cognitive science research over the past few decades has been Douglas Hofstadter's notion of strange loops from G del Escher Bach 1979 Hofstadter is also an active literary translator who has written about translation perhaps most notably in his 1997 book *Le Ton Beau de Marot* where he draws on his cognitive science research And yet he has never considered the possibility that translation might itself be a strange loop In this book Douglas Robinson puts Hofstadter's strange loops theory into dialogue with a series of definitive theories of translation in the process showing just how cognitively and affectively complex an activity translation actually is

*My Universe-A Transcendent Reality* Alex Vary, 2011-11-21 A theme throughout *My Universe* is that our consciousness exists simultaneously in transcendent and material domains The gift and power of transcendent consciousness is that we apparently share it with extraterrestrial beings everywhere in the cosmos Author Vary describes sub quantum hyperspace phenomena that enable and mediate our communion with extraterrestrials These reflections prompted Vary to muse that in this sense we are all extraterrestrials Our consciousness transcends the material and elevates and entwines our spirits *My Universe A Transcendent Reality* is a literary work with profound technological and teleological overtones Vary's prophetic prose poesy essays combine physics metaphysics cosmology theology and philosophy He offers extraordinary radical ideas that can expand our dominion over nature and promote self realization Vary's book differs from others of its genera because it presents a rational basis for understanding the transcendent reality that influences our lives and by which we can enhance our interpersonal relations and infinite potentials *My Universe* describes the foundation for perceiving a transcendent reality with quantum phenomena which we may experimentally observe as evidence of the intertwining of the transcendent and material From this foundation we may realize transcendent communications with extraterrestrial beings This is because there is a bond between transcendent reality and material reality between transcendent human consciousness and extraterrestrial reality which are seemingly separated only by a tenuous hyperspace interface that may be traversed by advanced human techniques Describes paradigms that enable and implement our transcendent consciousness and our relation to and contact with extraterrestrial worlds and beings Gives entertaining provocative clarification of great ideas in cosmology philosophy theology sociology evolution metaphysics and sub quantum physics Speaks to all cultures innovators writers poets artists scientists explains the nature of our world so that we may better apply our infinite potentials Promotes broadening of one's spiritual self realization challenging revolutionary transformational and inspiring needed in this crucial juncture of time Suggest transcendent control of nature through sub quantum phenomena and harnessing cold fusion power and changing lead to gold actually metaphorically Proclaims people may aspire to a personal paradise because no matter how bad life on Earth becomes everyone may prepare for access to a transcendent paradise

Jim Neidhardt,1992 The cultural fragmentation spawned by the destructive dualisms of our age has heightened the urgency of the search for common ground in theological and scientific inquiry In *The Knight's Move* theologian James E Loder at Princeton Seminary and physicist W Jim Neidhardt at the New Jersey Institute of Technology propose a unifying connection in a generic concept of spirit graphically represented by the strange loop relationality of the Mobius band This relational logic is disclosed in surprisingly analogous ways in the knight's move of discovery in both science and theology whether in the leap of insight or in the leap of faith At the irreducible core of the knight's move is the self involvement of the knower pointing to the proximate relationality of the human spirit to the contingent relationality of physical reality and ultimately to the trinitarian relationality of God's Spirit In the pivotal knight's moves of Niels Bohr's complementarity in the exploration of quantum physics and Soren Kierkegaard's qualitative dialectic in the exploration of human nature and the relational logic of the incarnation the authors establish a model of spirit that illuminates remarkable interdisciplinary convergences in human development Piaget scientific discovery Einstein and theological knowledge T F Torrance This relational model also describes the fundamental pattern governing the transformational dynamics of human experience from the individual journey of intensification to the corporate life of communal interaction The central insights of *The Knight's Move* are grounded in the relation of human spirit and Divine Spirit a gracious personal interplay pictured in the unending paradoxical unity of the strange loop This foundation for the self relational nature of human knowing provides a fruitful way of conceptualizing common roots in theology and science as revealed in the astonishing developments of the twentieth century Communication and the Human Condition W. Barnett Pearce,1989 Starting with the premise that we live in communication rather than standing outside communication and using it for secondary purposes Pearce claims that people who live in various cultures and historical epochs not only communicate differently but experience different ways of being human because they communicate differently This century he

notes ushered in the communication revolution the discovery that communication is far more important and central to the human condition than ever before realized Essential to the communication revolution is the recognition that multiple forms of discourse exist in contemporary human society Further these forms of discourse are not benign they comprise alternative ways of being human Thus communication theory must encompass all that it means to live a life the shape of social institutions and cultural traditions the pragmatics of social action and the poetics of social order

**I Am a Strange Loop** Douglas R Hofstadter,2007-08-01 One of our greatest philosophers and scientists of the mind asks where does the self come from and how our selves can exist in the minds of others Can thought arise out of matter Can self soul consciousness I arise out of mere matter If it cannot then how can you or I be here I Am a Strange Loop argues that the key to understanding selves and consciousness is the strange loop a special kind of abstract feedback loop inhabiting our brains The most central and complex symbol in your brain is the one called I The I is the nexus in our brain one of many symbols seeming to have free will and to have gained the paradoxical ability to push particles around rather than the reverse How can a mysterious abstraction be real or is our I merely a convenient fiction Does an I exert genuine power over the particles in our brain or is it helplessly pushed around by the laws of physics These are the mysteries tackled in I Am a Strange Loop Douglas Hofstadter s first book length journey into philosophy since G del Escher Bach Compulsively readable and endlessly thought provoking this is a moving and profound inquiry into the nature of mind
