**The Business Systems Development Process** Roger E. Walters, 1987-02-17 Roger E Walters has written a timely and helpful analysis of the recent boom in application software development and he addresses the needs and concerns of executives responsible for obtaining and updating these systems This nontechnical treatment sets out a step by step approach describing how non data processing personnel can control and manage the development and installation of relevant new information systems Using a management perspective Walters analyzes factors including risk management personnel shortages computer literacy project management and system maintenance all of which are critical for the success of the information system and the organization which relies on it *Developing Business Systems with CORBA with CD-ROM*

Waqar Sadiq, Fred A. Cummins, 1998-04-13 *Developing Business Systems with CORBA* guides developers programmers and software managers through the development of object oriented distributed business systems using CORBA Common Object Request Broker Architecture CORBA allows vendors to provide compatible components for the implementation of distributed systems in heterogeneous environments involving multiple operating systems and programming languages The authors use their experience as developers trainers and mentors to provide a solid understanding of CORBA technology by examining a realistic example system They introduce concepts and terminology and lead up to a strategic architecture for distributed objects computing They present CORBA in detail while introducing the reader to project management issues and the requirements for a business objects facility to integrate CORBA components and provide an abstraction for application development Later chapters explore design issues programming and incorporating product features The accompanying CD ROM contains a demonstration application and a copy of the Enterprise Business Objects Facility EBOF developed at EDS

Information System Development Process N. Prakash, C. Rolland, B. Pernici, 2014-06-28 This volume aims to pave the way to a greater understanding of the information system development process Traditionally information systems have been perceived as a slice of real world history This has led to a strong emphasis on the development of conceptual models the requirements specifications of which can readily be expressed However the route to such an expression or the process of development has not received any substantial attention It is now agreed that a study of the development process affords notable benefits Firstly it helps to create an understanding of what a realistic development process is and how it proceeds from an initial specification to its acceptable representation Secondly the nature of guidance that can be provided by the next generation of CASE tools can be substantially improved It can be expected that these tools will cease to be mere drafting aids and consistency checking programs Instead it is likely that they will provide a proactive environment in which the development engineer will play an important role This tool user symbiosis should have a beneficial impact on both the productivity of the developer and on the quality of the product In bringing together researchers and practitioners from such diverse areas as AI Software Engineering Decision Support and Information Systems it is hoped this publication will take the

quest to comprehend information system development processes a significant step forwards Business Systems Analysis with Ontologies Green, Peter F., Rosemann, Michael, 2005-03-31 This book shows systems analysts and business analysts how ontological thinking can help them clarify requirements analysis tasks in business systems Provided by publisher
