Handbook of Research on Improving Engineering Education With the European Project Semester Malheiro, Benedita, Fuentes-Durá, Pedro, 2022-03-18 Engineering education aims to prepare engineering undergraduates for their future professional journey where they will be called on to solve challenges affecting individuals, companies and society. The European Project Semester (EPS) exposes students to project and challenge based learning, paying special attention to international multidisciplinary teamwork, sustainable design, innovative thinking and project management in order to develop a set of desired professional skills. The Handbook of Research on Improving Engineering Education With the European Project Semester shares the best practices in engineering education through close examination of the EPS. It describes the adopted learning framework, analyzes how it contributes to the development of skills, reports on the types of challenges proposed to teams and delivers a set of team project cases from the network of providers. Covering topics such as engineering ethics, project management and sustainable behavior, this book is essential to students, engineering educators, engineering educators, educational researchers, academic administration and faculty, and academicians.

Assessment in Technical and Professional Communication Margaret Hundleby, Jo Allen, 2017-07-05 This collection of essays focuses on both how and why assessment serves as a key element in the teaching and practice of technical and professional communication. The collection is organized to form a dual approach: on the one hand, it offers a landscape view of the activities involved in assessment, examining how it works at institutional, program and classroom levels; on the other, it surveys the implications of using assessment for formulating, maintaining and extending the teaching and practice of technical communication. The book offers teachers, students, scholars and practitioners alike evidence of the increasingly valuable role of assessment in the field as it supports and enriches our thinking and practice. No other volume has addressed the demands of and the expectations for assessment in technical communication. Consequently, the book has two key goals. The first is to be as inclusive as is feasible for its size, demonstrating the global operation of assessment in the field. For this reason, descriptions of assessment practice lead to examinations of some key feature of the landscape captured by the term technical communication. The second goal is to retain the public and cooperative approach that has characterized technical communication from the beginning. To achieve this, the book represents a conversation with contributors chosen from among practicing, highly active technical communication teachers and scholars, and the chapters set up pairs of opening statement and following response. The overriding purpose of the volume therefore is to invite the whole community into the conversation about assessment in technical communication.

Teaching Professional and Technical Communication Tracy Bridgeford, 2018-09-21 Teaching Professional and Technical Communication guides new instructors in teaching professional and technical communication. The essays in this volume provide theoretical and applied discussions about the teaching of this diverse subject, including relevant

pedagogical approaches how to apply practical aspects of PTC theory and how to design assignments This practicum features chapters by prominent PTC scholars and teachers on rhetoric style ethics design usability genre and other central concerns of PTC programs Each chapter includes a scenario or personal narrative of teaching a particular topic provides a theoretical basis for interpreting the narrative illustrates the practical aspects of the approach describes relevant assignments and presents a list of questions to prompt pedagogical discussions Teaching Professional and Technical Communication is not a compendium of best practices but instead offers a practical collection of rich detailed narratives that show inexperienced PTC instructors how to work most effectively in the classroom Contributors Pam Estes Brewer Eva Brumberger Dave Clark Paul Dombrowski James M Dubinsky Peter S England David K Farkas Brent Henze Tharon W Howard Dan Jones Karla Saari Kitalong Traci Nathans Kelly Christine G Nicometo Kirk St Amant **A Text Book Of Professional Communication** Subhash Ranade,2006 **Technical Communication with 2009 MLA and 2010 APA Updates** Mike Markel,2010-06-15 Click here to find out more about the 2009 MLA Updates and the 2010 APA Updates Comprehensive and truly accessible Technical Communication guides students through planning drafting and designing the documents that will matter in their professional lives Known for his student friendly voice and eye for technology trends Mike Markel addresses the realities of the digital workplace through fresh samples and cases practical writing advice and a companion Web site TechComm Web that continues to set the standard with content developed and maintained by the author The text is also available in a convenient affordable e book format *Writing and Speaking in the Technology Professions* David F.
