Ochoa,Gruia-Catalin Roman,2006-08-10 On behalf of the Organizing Committee for this event we are glad to welcome you to IWASE 2006 the First International Workshop on Advanced Software Engineering We hope you will enjoy the traditional Chilean hospitality and of course please tell us how we can make your visit a pleasant and useful experience The goal of this Workshop is to create a new forum for researchers professionals and educators to discuss advanced software engineering topics A distinctive feature of this Workshop is its attempt to foster interactions between the Latin American software engineering community and computer scientists around the world This is an opportunity to discuss with other researchers or simply to meet new colleagues IWASE 2006 has been organized to facilitate strong interactions among those attending it and to offer ample time for discussing each paper IWASE 2006 attracted 28 submissions from 14 countries 8 of them outside Latin America Each of the 28 articles was reviewed by at least three members of the Program Committee As a result of this rigorous reviewing process 13 papers were accepted nine full papers and four work in progress papers These papers were grouped in four tracks software architecture software modeling software development process and experiences in software development Innovations and Advanced Techniques in Computer and Information Sciences and Engineering Tarek Sobh,2007-09-04 Innovations and Advanced Techniques in Computer and Information Sciences and Engineering includes a set of rigorously reviewed world class manuscripts addressing and detailing state of the art research projects in the areas of Computer Science Computer Engineering and Information Sciences Innovations and Advanced Techniques in Computer and Information Sciences and Engineering includes selected papers from the conference proceedings of the International Conference on Systems Computing Sciences and Software Engineering SCSS 2006 which was part of the International Joint Conferences on Computer Information and Systems Sciences and Engineering CISSE 2006 All aspects of the conference were managed on line not only the reviewing submissions and registration processes but also the actual conference Conference participants authors presenters and attendees only needed an internet connection and sound available on their computers in order to be able to contribute and participate in this international ground breaking conference The on line structure of this high quality event allowed academic professionals and industry participants to contribute work and attend world class technical presentations based on rigorously refereed submissions live without the need for investing significant travel funds or time out of the office Suffice to say that CISSE received submissions from more than 70 countries for whose

researchers this opportunity presented a much more affordable dynamic and well planned event to attend and submit their work to versus a classic on the ground conference The CISSE conference audio room provided superb audio even over low speed internet connections the ability to display PowerPoint presentations and cross platform compatibility the conferencing software runs on Windows Mac and any other operating system that supports Java In addition the conferencing system allowed for an unlimited number of participants which in turn granted CISSE the opportunity to allow all participants to attend all presentations as opposed to limiting the number of available seats for each session
