

The Ultimate Abs Exercise Plan

Having worked at Men's Health magazine for more than 10 years, I've seen all the trends. (Oh, electrodes on my abs? No, thanks.) I've talked to trainers. I've tried just about every exercise ever concocted. In a lot of ways, my workout is my work. But I'm also busy with calls, meetings, and all the stresses that go with any job. So I know you want an exercise plan that fits into your life—not one that is your life. This routine is short and simple. In addition to performing this workout three times a week, train your largest muscle groups with classic moves like squats, bench presses, deadlifts, and rows. And add the 12 Abs Diet powerfoods to your diet. (See Men'sHealth.com for a meal plan to go.) The end result: You'll lose fat, build muscle, flatten your stomach—and change your body forever.

THE WORKOUT This routine attacks your midsection from every angle, so your abs are constantly challenged. Choose one exercise from each row for a total of five. Perform any exercise immediately after the other for the specified number of repetitions. Then repeat the circuit after 2 weeks. Choose the circuit in each group that you did a particular part of your previous workouts. This ensures that your muscles are always adapting to new stress.

WARM-UP YOUR CORE This interval routine is designed to strip away the excess fat that's hiding your six-pack. Do it 3 days a week, after your weight session or on the days in between. Use your choice of choice—a treadmill, stationary bike, or rowing machine.

STEP 1 Warm-up for 3 to 5 minutes at an easy pace, about 30 to 40 percent of your best effort.

STEP 2 Run, cycle, or row at 90 percent of your highest effort for 30 seconds.

STEP 3 Perform active rest, allowing your heart rate to drop to your resting level for 30 seconds.

STEP 4 Repeat two to seven times.

STEP 5 Choose you can complete eight intervals, reduce the length of your active rest periods for 5 to 10 seconds each workout, until they're only 30 seconds long.
