Operator Theory, Function Spaces, and Applications Tanja Eisner, Birgit Jacob, André Ran, Hans Zwart, 2016-09-24 This volume collects a selected number of papers presented at the International Workshop on Operator Theory and its Applications IWOTA held in July 2014 at Vrije Universiteit in Amsterdam Main developments in the broad area of operator theory are covered with special emphasis on applications to science and engineering The volume also presents papers dedicated to the eightieth birthday of Damir Arov and to the sixty fifth birthday of Leiba Rodman both leading figures in the area of operator theory and its applications in particular to systems theory

Interpolation and Realization Theory with Applications to Control Theory Vladimir Bolotnikov, Sanne ter Horst, André C.M. Ran, Victor Vinnikov, 2019-04-08 This volume is devoted to Joseph A Joe Ball s contributions to operator theory and its applications and in celebration of his seventieth birthday Joe Ball s career spans over four and a half decades starting with his work on model theory and related topics for non contractions and operators on multiply connected domains Later on more applied operator theory themes appeared in his work involving factorization and interpolation for operator valued functions with extensive applications in system and control theory He has worked on nonlinear control time varying systems and more recently on multidimensional systems and noncommutative H theory on the unit ball and polydisk and more general domains and these are only the main themes in his vast oeuvre Fourteen research papers constitute the core of this volume written by mathematicians who have collaborated with Joe or have been influenced by his vast mathematical work A curriculum vitae a publicationslist and a list of Joe Ball s PhD students are included in this volume as well as personal reminiscences by colleagues and friends

Kaashoek, 2008-09-25 Mathematicians do not work in isolation They stand in a long and time honored tradition They write papers and sometimes books they read the publications of fellow workers in the field and they meet other mathematicians at conferences all over the world In this way in contact with colleagues far away and nearby from the past via their writings and from the present scientific results are obtained which are recognized as valid And that remarkably enough regardless of ethnic background political inclination or religion In this process some distinguished individuals play a special and striking role They assume a position of leadership They guide the people working with them through uncharted territory thereby making a lasting imprint on the field So things which can only be accomplished through a combination of rare talents usually broad knowledge unfailing intuition and a certain kind of charisma that binds people together All of this is present in Israel Gohberg the man to whom this book is dedicated on the occasion of his 80th birthday This comes to the foreground unmistakably from the contributions from those who worked with him or whose life was affected by him Gohberg s exceptional qualities are also apparent from the articles written by himself sometimes jointly with others that are reproduced in this book Among these are stories of his life some dealing with mathematical aspects others of a more general nature Also included are reminiscences paying tribute to a close colleague who is not among us anymore
