Heidegger's project In this second volume he illuminates their significance for Heidegger's phenomenology of perception and his philosophy of history At stake is the possibility of a new experience and understanding of being Taking us beyond the metaphysical understanding of being Heidegger proposes to introduce a new key word Seyn beyng Beyng is the Da sein appropriating event in which a clearing occurs as an open dimension for the time space interplay of concealment and unconcealment an interplay within which beings are experienced in regard to the various modes and inflections of presence and absence that the grammar of temporalities articulates Concentrating on the appropriation of seeing and hearing as capacities and capabilities bearing promising potentialities that could be developed Kleinberg Levin examines seeing and hearing in the context of Heidegger's critique of the history of metaphysics wherein vision has served as paradigm for knowledge truth and reality He shows that in Heidegger's philosophy of history seeing and hearing are given a role in the transformation of the character of humanity redeeming their own inherent potential Perceptual experience has undergone accelerating processes of deformation and reification encouraging a disposition that makes it serve technological and technocratic imperatives but we might begin to redeem the promising potential in seeing and hearing turning their damaged and dehumanized character and their violence towards the creation of a new planetary existence what Heidegger imagines through the topology of the fourfold earth and sky mortals and the gods who embody our ideals In this project we are put in question by a responsibility that summons us in our seeing and hearing to the response abilities most befitting our historically shared sense of an achieved humanity
