Transformation of Primary Schools Jiří Zounek, Oto Polouček, Michal Šimáně, 2024-05-09 This book addresses the transformation of primary education in the former Czechoslovakia now the Czech Republic after the fall of the communist regime in 1989 It follows the overall transformation of education and school policy and offers original insights into the everyday life of the schools at that time It also provides a unique perspective on the whole transformation process The work discusses the school environment in the context of specific local characteristics such as parents community regional institutions and national and international contexts The book specifically focuses on the changes in primary school management in terms of economics organization and personnel The processes of pedagogical change are an essential theme of the book They cover how teachers proceeded through the changes in their work at the time of the transformation and the reasons for their resistance to change including the challenges that the transformation introduced into their work and personal lives The book also monitors how the teachers navigated the selection and use of new textbooks and tools such as digital tools The work originates in historical pedagogical research based primarily on the oral history method and complemented by the study of contemporary documents **The Dialectic of a Concrete** Ivan Sviták, 1978 Ethnology

Geography in Czechia: Themes and Concepts Eva Semotanová, Pavel Chromý, Zdeněk Kušera, 2023-11-06 Although the content of historical geography may be viewed from different perspectives there is no doubt that historical geography has interdisciplinary character The publication represents an outcome of cooperation among geographers and historians within the Historical Geography Research Centre that continues more than forty years old tradition of common researches in Czechia Beside discussing the disciplinary origins the most vital research topics of present Czech historical geography are reflected in its contents transformations of landscapes historical towns and of regions **Proměny polonistiky** Michala

underlying understandings of key concepts such as women gender equality discrimination and rights In so doing it shows the fundamental intellectual and conceptual difficulties faced by gender equality law in Czechia These include an essentialist understanding of differences between men and women a notion that equality and anti discrimination law is incompatible with freedom and a perception that existing laws are objective and neutral while any new gender progressive regulation of social relations is an unacceptable interference with the natural social order Timely and provocative this book will be required reading for all scholars of equality and gender and the law **Poetry Criticism** ,1991 **A GUIDE TO THE WORLD OF**
