Object-Oriented Application Development Using the Caché Postrelational Database

Wolfgang Kirsten, Michael Ihringer, Mathias Kühn, Bernhard Röhrig, 2012-12-06 Nowadays newly developed software packages are often obsolete already at the time of their introduction Object oriented software development is a possible if not the only solution to this dilemma applications are modeled as software objects that describe the properties and the behavior of real world entities Such objects are encapsulated in that they hide behind a publicly known interface the complexity of their internal data structures and behaviors This enables objects to be used in a wide range of program

packages without needing to know the details of their internal implementation Linking object oriented modeled applications with a database places special demands on a database management system and development environment when the usual performance and semantics losses are to be avoided This book provides a detailed description of the object model of the Cach postrelational database This second revised and expanded edition includes the many new features of Cach 5 There is a comprehensive description of the new Cach Studio with its improvements for developing and debugging applications as well as a whole new chapter about XML and SOAP based Web Services The chapters about Java ActiveX and the SQL manager have undergone a complete revision

[From Polarisation to Multispecies Relationships](#) Janet J. McIntyre-Mills, Yvonne Corcoran-Nantes, 2021-08-05 This book explores the concept of multi species relationships and suggests critical systemic pathways to protect shared habitats This book discusses how the eradication of species as a result of rapid urbanisation places humanity at risk This book demonstrates how narrow anthropocentrism has focused on the rights of human beings at the expense of other species and the environment This book explores a priori norms and a posteriori measures and indicators to include and protect multiple species This book aims to strengthen institutional capacity and powers to address and extend the UN 2030 Sustainable Development Agenda by drawing on local wisdom but also the need to implement laws to prevent ecocide This book highlights that our fragile interdependence requires a recognition of our hybridity and interconnectedness within the web of life and suggests ways to reframe policy within and beyond the nation state to support living systems of which we are a strand
