new comparative advantages and skills Specifically this book looks at the vulnerable communities and exposed areas particularly in urban areas that tend to experience higher susceptibility to external risks such as climate change natural disasters and public health emergencies have been largely ignored in incremental adaptation plans Vulnerable communities and areas not only require different adaptive responses to climate risk but also possess unlocked adaptive capacity that can motivate different patterns of sustainable development to achieve the goals of the 2030 Agenda It is essential therefore to view transformative growth and fundamental reorientation of economic resources as integral parts of the solution Social disorganisation and vulnerability are other undesired outcomes of the unpredictable and widespread external economic shocks This is due to a sudden and tough competition between members of society to acquire precious resources most of which may be depleted during unprecedented events such as natural disasters or pandemics resulting in an even more chaotic and disorganised conditions

*Coworking Spaces* Izaskun Chinchilla,2020 [Coworking-spaces](#) Lars Görmar,2022 **Coworking Spaces** Janet

Merkel, Dimitris Pettas, Vasilis Avdikos, 2023-11-07 This contributed volume considers the emergence of coworking as centered in labor issues More specifically its chapters consider it as a coping mechanism in the worldwide rise of independent modes of work i e self employment that leaves more and more workers exposed to precarity as they must organize and manage their own labor Grounded in this perspective this volume aims to understand the transformative social and political potentials emerging through coworking as a social and spatial practice There is a distinct lack of discussion within coworking research on the emancipatory potentials of coworking and if it is discussed more cautionary views prevail highlighting the ambivalence of coworking spaces both as a space of alternative economic practices and as integrated into market economies The aims of this collection are twofold First it aims to make visible the plurality of existing practices around shared resources in coworking and the assemblages of human and non human actors as agents of change associated with coworking and the re organization of work and labor power And second it aims to develop a more emancipatory narrative for coworking and the role of coworking spaces for workers but also the different spatial contexts in which these spaces are situated A narrative that does not emphasize entrepreneurship or coworking as the epitome of the neoliberal entrepreneurial self as in the dominant interpretations in the current research but rather one that centers coworking in the creation of meaningful careful social relationships supporting empathy and an ethics that recognizes mutual interdependencies and builds a foundation for social change So it is about alternative narratives emancipation politics and the wider social role that coworking spaces might play in neighborhoods cities or beyond because they are crucial contexts for the formation and maintenance of social relations With this specific direction this collection aims to bring coworking research into a fruitful dialog with other research fields such as sociology of work feminist perspectives on care alternative and diverse economies post capitalist transformation critical geography positioning coworking within a range of progressive alternatives in the articulation of economic and social relationships

Flexibility Vs. Community: Two Studies About Coworking Space and the Member's Social Connectivity Yaoyi Zhou, 2021 Although coworking is commonly associated with the concept of community few studies have explored whether and how coworking empowers social network formations among the members The primary goal of this dissertation is to explore how coworking members are socially connected and what environmental factors are related to their social networks formation This dissertation is composed of two studies Study 1 is an exploratory study that investigates coworking space characteristics and the members social connectivity Mixed methods were applied to study coworking spaces in New York City A total of 12 coworking managers were interviewed and this qualitative data was complemented by 160 hours of participant observation and surveys finished by 42 coworking members from 7 coworking spaces The results suggest that social connectivity between the members was low even before the Covid 19 pandemic Three major reasons were identified lack of opportunity lack of motivation and a behavioral norm of minimizing interaction in the open plan environment Both the type of membership plan and space access time were found to

be significantly associated with the members social connectivity These findings led me to explore the nature of flexibility in coworking I propose that flexibility is about the spatial temporal relationship between the space and the occupants which can be described as how much visibility and mobility the space offers and how much time the occupants are physically present in the space A follow up question was raised are there potential conflicts between flexibility and the members social network formation A 2x2 online survey experiment Study 2 was conducted to examine whether increased spatial temporal flexibility negatively affects an individual s attitudes toward social interaction in the work settings Based on data collected from a sample of 315 participants recruited using Amazon s Mechanical Turk results suggested supportive evidence for my hypotheses Increased flexibility in space and time negatively affected an individual s attitude toward social interaction Increased time flexibility was also negatively associated with social connectivity according to the participants previous coworking experience These results suggest that the nature of coworking may embody a conflicting relationship between the two concepts flexibility and community Overall this dissertation offers a critical understanding of the coworking environment the member s social connectivity and the relationships between the two What these findings imply for understanding coworking s future and how environment and behavior research could be applied to study emerging design concepts are also addressed
