Capital and Credit Michio Morishima, 1994-03-25 Contemporary general equilibrium theory is characteristically short run separated from monetary aspects of the economy and as such does not deal with long run problems such as capital accumulation innovation and the historical movement of the economy These phenomena are discussed by growth theory which assumes a given or shifting production function and in turn cannot therefore deal with the fundamental problem of growth namely how the production function is derived Thus traditional theories have a common weakness in that they divorce real economic growth from the activities of the financial sector This book provides a much needed synthesis of growth theory and monetary theory Professor Morishima draws on the work of Schumpeter Keynes and the pre war neoclassical economists to formulate a capital theoretic general equilibrium theory *Science Friction* Michael Shermer, 2010-04-01 The bestselling author delves into the unknown from heretical ideas about the boundaries of the universe to Star Trek's lessons about chance and time A scientist pretends to be a psychic for a day and fools everyone An athlete discovers that good luck rituals and getting into the zone may or may not improve his performance A historian decides to analyze the data to see who was truly responsible for the Bounty mutiny A son explores the possibilities of alternative and experimental medicine for his cancer ravaged mother And a skeptic realizes that it is time to turn the skeptical lens onto science itself In each of the fourteen essays in *Science Friction* psychologist and science historian Michael Shermer explores the very personal barriers and biases that plague and propel science especially when scientists push

against the unknown What do we know and what do we not know How does science respond to controversy attack and uncertainty When does theory become accepted fact As always Shermer delivers a thought provoking fascinating and entertaining view of life in the scientific age From breast implants to Captain Bligh Michael Shermer examines the way we humans perceive news and history He s given a lot of things a lot of thought If your perceptions have ever rubbed you the wrong way you ll find Science Friction fascinating Bill Nye The Science Guy Shermer s main obsession is the truth amateur skeptics will learn from his matter of fact dismissals of astrology and creationism Psychology Today Physics of Radioactivity Noah Ernest Dorsey,1921 Engineering ,1925 Philosophical Magazine ,1923 California.
