Voices of Europe Simon Hug, 2002-03-04 Referendums are playing an increasingly influential role in the process of European integration Starting with the entry of a first wave of new European Community members in the 1970s this instrument of popular decision making has grown ever more important Later stages in the enlargement process of the European Union have led to even more referendums Indeed European integration was seriously jeopardized when Danish voters first rejected the Maastricht Treaty and France s citizens almost joined them Yet we know very little about how referendums affect the integration process This landmark study bridges this gap in two ways First it offers a thorough comparative analysis of referendums that have occurred so far in the process of European integration Utilizing a detailed study of voting behavior by citizens in these referendum campaigns Simon Hug argues that understanding this behavior is of crucial importance if we want to accurately assess the impact of referendums on European integration The author then draws on his comparative data to analyze the likely consequences of referendums based on those that have taken place and proposals for new initiatives With its detailed empirical analysis and theoretical foundation this book makes an important contribution both to the study of referendums and to our understanding of institutional reform and integration within the EU

Politicisation, Democratisation and EU Identity Claudia Wiesner, 2024-02-02 What is it that unites the European Union as a polity Why is it necessary to democratise the EU Can EU politicisation help democratising the EU Why do EU citizens in referenda seemingly vote against the EU And how can a European identity develop To tackle these questions this book makes a theoretical conceptual and empirical contribution to the study of EU politicisation democratisation identity formation and the ways these three are related to one another The results of a thorough comparative analysis of two prototypical cases namely French and German national EU discourses and in particular the discourses on the Treaty on a Constitution for Europe TCE in 2005 are discussed in relation to more current events such as Brexit and the French elections of 2022 The book thus develops key concepts and theoretical models and delivers profound findings on EU democratisation identity politicisation and contestation and their interrelations This book will be of key interest to scholars and students of European Union studies politics democratic theory discourse analysis and

more broadly to comparative politics The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
