Kocurek, 2015-09-30 Video gaming it's a boy's world right That's what the industry wants us to think Why and how we came to comply are what Carly A Kocurek investigates in this provocative consideration of how an industry's craving for respectability hooked up with cultural narratives about technology masculinity and youth at the video arcade From the dawn of the golden age of video games with the launch of Atari's Pong in 1972 through the industry wide crash of 1983 to the recent nostalgia bathed revival of the arcade Coin Operated Americans explores the development and implications of the video gamer as a cultural identity This cultural historical journey takes us to the Twin Galaxies arcade in Ottumwa Iowa for a close look at the origins of competitive gaming It immerses us in video gaming's first moral panic generated by Exidy's Death Race 1976 an unlicensed adaptation of the film Death Race 2000 And it ventures into the realm of video game films such as Tron and WarGames in which gamers become brilliant boyish heroes Whether conducting a phenomenological tour of a classic arcade or evaluating attempts then and now to regulate or eradicate arcades and coin op video games Kocurek does more than document the rise and fall of a now booming industry Drawing on newspapers interviews oral history films and television she examines the factors and incidents that contributed to the widespread view of video gaming as an enclave for young men and boys A case study of this once emergent and now revived medium became the presumed enclave of boys and young men Coin Operated Americans is history that holds valuable lessons for contemporary culture as we struggle to address pervasive sexism in the domain of video games and in the digital working world beyond
Books in Print Supplement , 1984 **Children's Books in Print** , 1986 The Charisma Machine Morgan G. Ames, 2019-11-19 A fascinating examination of technological utopianism and its complicated consequences In The Charisma Machine Morgan Ames chronicles the life and legacy of the One Laptop per Child project and explains why despite its failures the same utopian visions that inspired OLPC still motivate other projects trying to use technology to disrupt education and development Announced in 2005 by MIT Media Lab cofounder Nicholas Negroponte One Laptop per Child promised to transform the lives of children across the Global South with a small sturdy and cheap laptop computer powered by a hand crank In reality the project fell short in many ways starting with the hand crank which never materialized Yet the project remained charismatic to many who were captivated by its claims of access to educational opportunities previously out of reach Behind its promises OLPC like many technology projects that make similarly grand claims had a fundamentally

flawed vision of who the computer was made for and what role technology should play in learning Drawing on fifty years of history and a seven month study of a model OLPC project in Paraguay Ames reveals that the laptops were not only frustrating to use easy to break and hard to repair they were designed for technically precocious boys idealized younger versions of the developers themselves rather than the children who were actually using them The Charisma Machine offers a cautionary tale about the allure of technology hype and the problems that result when utopian dreams drive technology development
