catnip wikipedia - Dec 27 2021

web catnip is a herbaceous perennial plant in the mint family that has been used for centuries as a natural sedative and anorectic. It is known for its ability to induce a state of euphoria and relaxation in cats, which is why it is often used as a natural remedy for feline anxiety and stress. The active ingredient in catnip is nepetalactone, which binds to and stimulates the olfactory receptors in a cat's nose, triggering a response that is similar to that of a drug. This response is typically characterized by a state of hyperactivity, followed by a period of sedation and then a return to normal behavior. The effects of catnip are temporary and last for about 10-15 minutes.
