## **The Color Photo:**

**Understanding Color in Photography** Bryan Peterson, Susana Heide Schellenberg, 2017-08-29 Veteran photographer and instructor Bryan Peterson is best known for his arresting imagery using bold graphic color and composition. Here he explores his signature use of color in photography for the first time, showing readers his process for creating striking images that pop off the page. He addresses how to shoot in any type of light and looks at color families and how they can work together to make compelling images in commercial and art photography. He also helps readers understand exposure, flash, and other stumbling blocks that beginning and experienced photographers encounter when capturing images, showing how to get the most out of any composition. With its down-to-earth voice and casual teaching style, *Understanding Color in Photography* is a workshop in a book helping any photographer take their images to the next level. **Color Aerial**

**Photography** Richard S. Driscoll, 1971. Shrubs such as antelope bitterbrush, big sagebrush, snowberry, and true mountain mahogany can be identified more consistently on large scale 1:600, 1:1200 color infrared aerial photographs than on the same scale color aerial photographs. Identification of relatively large forbs including Fremont geranium and orange sneezeweed is also easier on large scale color infrared. Neither film type appeared to give improved information regarding site delineation on smaller scale photographs. Other features of the range environment including rodent disturbances can best be identified on color infrared at photo scales up to 1:2400. All of this depends on obtaining photographs at the right time of year in respect to phenology of the vegetation. *Exploring Color Photography Fifth Edition* Robert

Edward John Wall, 1925. **The Colors of Photography** Bettina Gockel, 2020-12-16. *The Colors of Photography* aims to provide a deeper understanding of what color is in the field of photography. Until today, color photography has marked the here and now, while black and white photographs have been linked to our image of history and have formed our collective memory. However, such general dichotomies start to crumble when considering the aesthetic, cultural, and political complexity of color in photography. With essays by Charlotte Cotton, Bettina Gockel, Tanya Sheehan, Blake Stimson, Kim Timby, Kelley Wilder, Deborah Willis, photographic contributions by Hans Danuser and Raymond Meier. **Exploring Color Photography** Robert Hirsch, 2014-12-17.
