The Moon An Observing Guide For Backyard Telescopes:

The Moon Michael Kitt,1992 **Photographic Atlas of the Moon** S. M. Chong,Albert Lim,P. S. Ang,2002-07-25 The Photographic Atlas of the Moon is a day by day photographic guide to observing the features of the Moon through a small telescope Compiled by three keen amateur astronomers each image was produced using a 40cm telescope and high resolution low speed film Whole Moon images are provided for each day of the 29 day lunar cycle with labelled features and accompanying descriptive text Selected lunar features are shown at high magnification to highlight and clearly illustrate certain regions All lunar features are labelled using current IAU terminology A comprehensive set of appendices detail the phases of the Moon give a chronology of lunar selenography and index all lunar features named in the text This atlas is an invaluable reference guide for amateurs engaging in lunar observations with a small telescope **Lunar Meteoroid**

Impacts and How to Observe Them Brian Cudnik,2010-03-10 The genesis of modern searches for observable meteoritic phenomena on the Moon is the paper by Lincoln La Paz in Popular Astronomy magazine in 1938 In it he argued that the absence of observed fashes of meteoritic impacts on the Moon might be interpreted to mean that these bodies are destroyed as luminous meteors in an extremely rarefed lunar atmosphere The paper suggested the possibility of systematic searches for such possible lunar meteors With these concepts in mind I was surprised to note a transient moving bright speck on the Moon on July 10 1941 It appeared to behave very much as a lunar meteor would except that the poorly estimated duration would lead to a strongly hyperbolic heliocentric velocity Thus the idea of systematic searches for both p sible lunar meteors and meteoritic impact fashes was born It was appreciated that much time might need to be expended to achieve any positive results Systematic searches were carried out by others and myself chiefly in the years 1945 1965 and became a regular program at the newly founded Association of Lunar and Planetary Observers or ALPO *Journal de la Société Royale D'astronomie Du Canada* Royal Astronomical Society of Canada,2009 Library catalogue in 1911 31 p appended to v 4

Historic Tales of Flagstaff Kevin Schindler & Michael Kitt,2019 Flagstaff Arizona was originally settled in the 1870s as a railroad and lumber town on the southwestern edge of the Colorado Plateau amid the ponderosa pines Now most noted for its proximity to the Grand Canyon the city offers a tantalizing combination of history and progress Theodore Roosevelt the Apollo astronauts Walt Disney filmmakers Navajo code talkers and Pluto discoverer Clyde Tombaugh all feature in the area s fascinating past Join authors Kevin Schindler and Michael Kitt as they relate the trials and triumphs that have given this town its charm from the tumultuous days of the Wild West to the fast paced twentieth century **A Buyer's and User's Guide to Astronomical Telescopes and Binoculars** James Mullaney,2013-10-10 Amateur astronomers of all skill levels are always contemplating their next telescope and this book points the way to the most suitable instruments Similarly those who are buying their first telescopes and these days not necessarily a low cost one will be able to compare and contrast different types and manufacturers This exciting and revised new guide provides an extensive overview of binoculars and telescopes It

includes detailed up to date information on sources selection and use of virtually every major type brand and model on today's market a truly invaluable treasure trove of information and helpful advice for all amateur astronomers Originally written in 2006 much of the first edition is inevitably now out of date as equipment advances and manufacturers come and go This second edition not only updates all the existing sections of A Buyer's and User's Guide to Astronomical Telescopes and Binoculars but adds two new ones Astro imaging and Professional Amateur collaboration Thanks to the rapid and amazing developments that have been made in digital cameras not those specialist cool chip astronomical cameras not even DSLRs but regular general purpose vacation cameras it is easily possible to image all sorts of astronomical objects and fields Technical developments including the Internet have also made it possible for amateur astronomers to make a real contribution to science by working with professionals Selecting the right device for a variety of purposes can be an overwhelming task in a market crowded with observing options but this comprehensive guide clarifies the process Anyone planning to purchase binoculars or telescopes for astronomy whether as a first instrument or as an upgrade to the next level will find this book a treasure trove of information and advice It also supplies the reader with many useful hints and tips on using astronomical telescopes or binoculars to get the best possible results from your purchase
