Multinational Companies from Japan Robert Fitzgerald, Chris Rowley, 2017-10-02 Since the bursting of Japan's bubble economy from 1990 onwards its multinational companies MNCs have faced new competitive challenges and questions about the management practices on which they had built their initial success in global markets Japanese engagement in the international economy has undergone a number of phases Historically Japanese MNCs learnt from foreign companies frequently through strategic alliances After the post war economic miracle Japanese manufacturers in particular converted themselves into MNCs transferred their home grown capabilities to overseas subsidiaries and made an impact on the world economy But the period after 1990 marked declining Japanese competitiveness and asked questions about the ability of Japanese MNCs to be more responsive and global in their strategies organization and capabilities It has been argued that the established management practices of Japanese MNCs inhibited adaptation to recent demands of global competition This volume presents new case evidence on how Japanese MNCs have responded to the new challenges of the global market place and it provides examples of how they have transformed strategies and competitive capabilities This book was originally published as a special issue of Asia Pacific Business Review

International Business and the Eclectic Paradigm John Cantwell, Rajneesh Narula, 2003-07-24 The eclectic paradigm has arguably become the dominant theoretical basis in the study of FDI multinational corporations and internationalisation over the last two decades The contributions to this volume evaluate the eclectic paradigm in the global economy and its validity as a theoretical basis to understand developments such as economic globali

Innovation and Industry Evolution David B. Audretsch, 1995 It once took two decades to replace one third of the Fortune 500 now a subset of new firms are challenging and displacing this elite group at a breathtaking rate while armies of startups come and go within just a few years Most new jobs are in fact coming from small firms reversing the trend of a century David Audretsch takes a close look at the U S economy in motion providing a detailed and systematic investigation of the dynamic process by which industries and firms enter into markets either grow and survive or disappear He shapes a clear understanding of the role that small entrepreneurial firms play in this evolutionary process and in the asymmetric size distribution of firms in the typical industry Audretsch introduces the large

longitudinal database maintained by the U S Small Business Administration that is used to identify the startup of new firms and track their performance over time He then provides different snapshots of the process of industries in motion why new firm startup activity varies so greatly across industries what happens to these firms after they enter the market the extent to which entrepreneurial firms account for an industry s economic activity and why that measure varies across industries how small firms compensate for size related disadvantages and who exits and why Audretsch concludes that the structure of industries is characterized by a high degree of fluidity and turbulence even as the patterns of evolution vary considerably from industry to industry The dynamic process by which firms and industries evolve over time is shaped by three fundamental factors technology scale economies and demand Most important the evidence suggests that it is the differences in the knowledge conditions and technology underlying each specific industry key elements in innovation that are responsible for the pattern particular to that industry

Joint Venture Agreements in the Qatari Gas Industry Talal Abdulla Al-Emadi, 2019-03-29 This book addresses a question of importance for both theory and practice Why are joint venture agreements preferred over other types of agreements such as concession agreements service contracts and production sharing agreements in the Qatari gas industry On a theoretical level the author analyses this decision making process by developing an approach that integrates a micro level analysis more specifically within international oil companies with a macro level analysis that spring from the organisational culture of the Qatari gas industry At the micro level the author proposes John Dunning s eclectic paradigm as one set of theoretical ideas to explaining one element of the decision making process leading to the preference for joint venture agreements that is that of international oil companies At the macro level the author proposes Antony Giddens structuration theory as another set of theoretical ideas to explaining another part of this decision making process that is how it is being shaped by the organisational culture of the Qatari gas industry On an empirical level the proposed book applies a combination of a micro economic approach such as Dunning s eclectic paradigm with a macro sociological approach such as Giddens structuration theory by empirical investigation Grounded on a qualitative strategy that focuses on the meaning making which brings together different perspectives of this decision making process including those of international oil companies and the organisational culture of the Qatari gas industry the proposed book utilises a case study design named the case of the Qatari gas industry The author employs a triangulation of data collection techniques to access empirical data analysing official documents and semi structured interviews a sample of the interview questions are included in an appendix to the proposed books In line with the qualitative nature of this proposed book a thematic Analysis is adopted to interpret data based on Dunning s eclectic paradigm at the micro level and Giddens structuration theory at the macro level In doing so this book connects theory with practice by investigating the preference for joint venture agreements in the case of the Qatari industry by the combined application of one of the most effective frameworks for explaining foreign direct investment named Dunning s eclectic paradigm along with the most complex

sociological framework that offers a rich definition of organisational culture named Giddens structuration theory Audience could include academics professionals and graduate and senior undergraduate students

International Economic Policy in the 1990s William R. Cline,1994 These eight lectures by noted economist William Cline provide a clear and concise account of some of the most important macroeconomic issues facing the world economy Designed for the nonspecialist but a source of fresh insight for the specialist as well the lectures synthesize the major trends in international economic policy for the 1990s Major themes include domestic and international economic stagnation adjustment to external imbalances trade policy including case studies of Japan and NAFTA the debt crisis reform in former communist states the economic future of Europe and environmental policy Cline who has made important contributions to the topics addressed reviews the forces that have contributed to policy problems and then evaluates the prospects for resolution He shows how an understanding of economics can help break down many policy problems into simple fundamentals and how empirical evidence is the acid test of any policy theory Cline s coverage of many of today s hot public policy issues is unique both in its accessibility and in its broadbrush approach to a set of concerns of immediate interest to economists policymakers and others concerned with international economic policy

The Multinational Firm Simon Collinson,Glenn Morgan,2009-06-02 The political economic and social impact of multi national enterprises MNEs on the rest of the world is significant and sometimes controversial Alternative and contradictory views of MNEs abound between divided and often distant factions This volume addresses commonly held beliefs and misconceptions about the nature and role of the multinationals It presents a range of perspectives by leading academics focusing on core themes and illustrating these themes with current business practices Comparisons are drawn between analyses of the performance based outcomes of an economics tradition and the more process and relationship oriented results of an organizational behavior approach The book offers a close examination of the evolution of multinational firms their new forms and organization and ultimately their global impact The result is an informed and engaging text charting the key developments which affect today s cross border businesses

Extending the Eclectic Paradigm in International Business H. Peter Gray,2003 John Dunning is undoubtedly the world s leading scholar on the subject of multinational corporations and international business This collection of original essays is designed to honor this work particularly his achievements during his association with Rutgers University

Institutions and the OLI Paradigm of the Multinational Enterprise John H. Dunning,Sarianna M. Lundan,2009 The prevailing ownership based theories of the firm are increasingly being challenged by new forms of organising as exemplified by the Asian network multinational enterprise MNE We believe that an institutional approach that tries to bridge both the macro and micro levels of analysis and that encompasses both formal and informal institutions offers a promising way to advance our understanding of the different forms of the contemporary MNE This paper introduces a theoretical framework which draws substantially on the work of Douglass North and examines how an

institutional dimension can be incorporated into the three components of the OLI paradigm National/Transnational
