Jones,Rachel Ellehuus,2022-02-02 This CSIS report examines the evolution of European military capabilities over the next decade It asks two main questions What military capabilities might European allies and partners of the United States possess by 2030 And what types of military missions will these states be able and unable to effectively perform by 2030 First European militaries including the largest and most capable European NATO members will continue to struggle to conduct several types of missions without significant U S assistance Second European militaries will face significant challenges in the Indo Pacific Third Europe s major powers will likely have the capability to conduct most types of missions at the lower end of the conflict continuum without significant U S military aid To sustain progress and overcome remaining challenges NATO will have to revise its burden sharing metrics modernize defense planning and procurement practices and address lagging political will Preventive Detention of Terror Suspects Diane Webber,2016-01-08 Preventive

detention as a counter terrorism tool is fraught with conceptual and procedural problems and risks of misuse excess and abuse Many have debated the inadequacies of the current legal frameworks for detention and the need for finding the most appropriate legal model to govern detention of terror suspects that might serve as a global paradigm This book offers a comprehensive and critical analysis of the detention of terror suspects under domestic criminal law the law of armed conflict and international human rights law The book looks comparatively at the law in a number of key jurisdictions including the USA the UK Israel France India Australia and Canada and in turn compares this to preventive detention under the law of armed conflict and various human rights treaties The book demonstrates that the procedures governing the use of preventive detention are deficient in each framework and that these deficiencies often have an adverse and serious impact on the human rights of detainees thereby delegitimizing the use of preventive detention Based on her investigation Diane Webber puts forward a new approach to preventive detention setting out ten key minimum criteria drawn from international human rights principles and best practices from domestic laws The minimum criteria are designed to cure the current flaws and deficiencies and provide a base line of guidance for the many countries that choose to use preventive detention in a way that both respects human rights and maintains security
