Urban Life:

Behavioural and Ecological Consequences of Urban Life in Birds Caroline Isaksson, Amanda D. Rodewald, Diego Gil, 2018-06-19 Urbanization is next to global warming the largest threat to biodiversity. Indeed, it is becoming increasingly evident that many bird species get locally extinct as a result of urban development. However, many bird species benefit from urbanization, especially through the abundance of human-provided resources and increase in abundance and densities. These birds are intriguing to study in relation to their resilience and adaptation to urban environments but also in relation to their susceptibility and the potential costs of urban life. This Research Topic, consisting of 30 articles (one review, two meta-analyses, and 27 original data papers), provides insights into species and population responses to urbanization through diverse lenses, including biogeography, community ecology, behaviour, life history, evolution, and physiology. Urban Geography Michael Pacione, 2009 This is the most comprehensive and readable book on urban geography in the array of contemporary literature on the subject. *The Sphinx in the City* Elizabeth Wilson, 1992-03-10 Elizabeth Wilson's elegant, provocative, and scholarly study uses fiction, essays, film, and art, as well as history and sociology, to look at some of the world's greatest cities: London, Paris, Moscow, New York, Chicago, Lusaka, and São Paulo, and presents a powerful critique of utopian planning, anti-urbanism, postmodernism, and traditional architecture. For women, the city offers freedom, including sexual freedom, but also new dangers. Planners and reformers have repeatedly attempted to regulate women and the working class and ethnic minorities by means of grandiose utopian plans, nearly destroying the richness of urban culture. City centers have become uninhabited business districts; the countryside suburbanized. There is danger without pleasure, consumerism without choice, safety without stimulation. What is needed is a new understanding of city life, and Wilson gives us an intriguing introduction to what this might be. Survival of the City Edward Glaeser, David Cutler, 2021-09-07 Expansive and entertaining. A fast-paced and highly readable journey, the book serves as a useful tool in the effort to redefine the role of the city in an age of increasingly polarized politics and reminds us that urban health is, as Fiorello La Guardia once remarked about cleaning the streets, not a Democratic or Republican issue. *New York Times Book Review*: One of our great urbanists and one of our great public health experts join forces to reckon with how cities are changing in the face of existential threats; the pandemic has only accelerated. Cities can make us sick. That's always been true: diseases spread more easily when more people are close to one another. And cities have been demonized as breeding grounds for vice and crime, from Sodom and Gomorrah on. But cities have flourished nonetheless because they are humanity's greatest invention: indispensable engines for creativity, innovation, wealth, and civilization itself. But cities now stand at a crossroads. During the global COVID crisis, cities grew silent; the normal forms of socializing ground to a halt. How permanent are these changes? Advances in technology mean that many people can opt out of city life as never before. Will they? Are we on the brink of a post-urban world? City life will survive, but individual cities face terrible risks, argue Edward Glaeser and David Cutler, and a wave of urban failure would be absolutely disastrous. In terms of

intimacy and inspiration nothing can replace what cities offer But great cities have always demanded great management and our current crisis has exposed fearful gaps in our capacity for good governance In America Glaeser and Cutler argue deep inequities in health care and education are a particular blight on the future of our cities solving them will be the difference between our collective good health and a downward spiral to a much darker place *Quality of Urban Life* Dieter Frick,Hans W.
