**Vector Quantization** Hüseyin Abut,1990 *Image and Text Compression* James A. Storer,2012-12-06 James A Storer Computer Science Dept Brandeis University Waltham MA 02254 Data compression is the process of encoding a body of data to reduce storage requirements With Lossless compression data can be decompressed to be identical to the original whereas with lossy compression decompressed data may be an acceptable approximation according to some fidelity criterion to the original For example with digitized video it may only be necessary that the decompressed video look as good as the original to the human eye The two primary functions of data compression are Storage The capacity of a storage device can be effectively increased with data compression software or hardware that compresses a body of data on its way to the storage device and decompress it when it is retrieved Communications The bandwidth of a digital communication link can be effectively increased by compressing data at the sending end and decompressing data at the receiving end Here it can be crucial that compression and decompression can be performed in real time *Bibliographic Guide to Computer Science* ,1991 American Book Publishing Record ,1991 1994 IEEE International Symposium on Circuits and Systems ,1994

**Subject Guide to Books in Print** ,1997 Selected Papers on Digital Halftoning Jan P. Allebach,1999 This text presents 76 papers on halftone imaging Subjects covered include basic principles point processes neighbourhood processes iterative methods printer models and colour The Colour Image Processing Handbook Stephen J. Sangwine,Robin E.N. Horne,2012-12-06 This book is aimed at those using colour image processing or researching new applications or techniques of colour image processing It has been clear for some time that there is a need for a text dedicated to colour We foresee a great increase in the use of colour over the coming years both in research and in industrial and commercial applications We are sure this book will prove a useful reference text on the subject for practicing engineers and scientists for researchers and for students at doctoral and perhaps masters level It is not intended as an introductory text on image processing rather it assumes that the reader is already familiar with basic image processing concepts such as image representation in digital form linear and non linear filtering trans forms edge detection and segmentation and so on and has some experience with using at the least monochrome equipment There are many books covering these topics and some of them are referenced in the text where appropriate The book covers a restricted but nevertheless a very important subset of image processing concerned with natural colour that is colour as perceived by the human visual system This is an important field because it shares much technology and basic theory with colour television and video equipment the market for which is worldwide and very large and with the growing field of multimedia including the use of colour images on the Internet

**Government Reports Announcements & Index** ,1986 *Mathematical Reviews* ,2002 **Fuzzy And Neural Approaches in Engineering** Lefteri H. Tsoukalas,Robert E. Uhrig,1997-02-05 Provides a truly accessible introduction and a fully integrated approach to fuzzy systems and neural networks the definitive text for students and practicing engineers Researchers are already applying neural networks and fuzzy systems in series from the use of fuzzy inputs and outputs for neural networks to the employment of individual neural networks to quantify the shape of a fuzzy membership function But the integration of these two fields into a neurofuzzy technology holds even greater potential benefits in reducing computing time and optimizing results Fuzzy and Neural Approaches in Engineering presents a detailed examination of the fundamentals of fuzzy systems and neural networks and then joins them synergistically combining the feature extraction and modeling capabilities of the neural network with the representation capabilities of fuzzy systems Exploring the value of relating genetic algorithms and expert systems to fuzzy and neural technologies this forward thinking text highlights an entire range of dynamic possibilities within soft computing With examples specifically designed to illuminate key concepts and overcome the obstacles of notation and

overly mathematical presentations often encountered in other sources plus tables figures and an up to date bibliography this unique work is both an important reference and a practical guide to neural networks and fuzzy systems
