Uprooting And Development:

Uprooting and Development George V. Coelho,2013-04-17 Uprooting has to do with one of the fundamental properties of human life the need to change and with the personal and societal mechanisms for dealing with that need As with the more general problems of change uprooting can be a time of human disaster and desolation or a time of adaptation and growth into new capacities The special quality of uprooting is that the need to change is faced at a time of separation from accustomed social cultural and environmental support systems It is this separation from familiar supports that either renders the uprooted vulnerable to the destructive consequences of change or creates freedoms for their evolution into new and constructive patterns of life Whether the outcomes will be destructive or constructive will be determined by the forces at work the nature and power of the uprooting forces versus the personal and societal capacities for coping with them Uprooting events are so widespread as to be compared with the major rites of life but with the difference that dislocation is involved Uprooting reaches from self imposed movements such as rural to urban migration running away and traveling abroad for schooling to natural and man made disasters such as earthquakes political oppression and war The impacts vary from the need to adapt to a new culture for an interim period of study to the desolating consequences of the total loss of family friends home and country

Uprooting and Development--Dilemmas of Coping with Modernization George V. Coelho,2014-01-15 *Hydrogeology, Chemical Weathering, and Soil Formation* Allen Hunt,Markus Egli,Boris Faybishenko,2021-04-06 Explores soil as a nexus for water chemicals and biologically coupled nutrient cycling Soil is a narrow but critically important zone on Earth's surface It is the interface for water and carbon recycling from above and part of the cycling of sediment and rock from below Hydrogeology Chemical Weathering and Soil Formation places chemical weathering and soil formation in its geological climatological biological and hydrological perspective Volume highlights include The evolution of soils over 3.25 billion years Basic processes contributing to soil formation How chemical weathering and soil formation relate to water and energy fluxes The role of pedogenesis in geomorphology Relationships between climate soils and biota Soils aeolian deposits and crusts as geologic dating tools Impacts of land use change on soils The American Geophysical Union promotes discovery in Earth and space science for the benefit of humanity Its publications disseminate scientific knowledge and provide resources for researchers students and professionals Find out more about this book from this Q A with the Editors

Ecofeminism Vandana Shiva,Maria Mies,2014-03-13 This groundbreaking work remains as relevant today as when it was first published Two of Zed's best known authors argue that ecological destruction and industrial catastrophes constitute a direct threat to everyday life the maintenance of which has been made the particular responsibility of women In both industrialized societies and the developing countries the new wars the world is experiencing violent ethnic chauvinisms and the malfunctioning of the economy also pose urgent questions for ecofeminists Is there a relationship between patriarchal oppression and the destruction of nature in the name of profit and progress How

can women counter the violence inherent in these processes Should they look to a link between the women s movement and other social movements Maria Mies and Vandana Shiva offer a thought provoking analysis of these and many other issues from a unique North South perspective They critique prevailing economic theories conventional concepts of women s emancipation the myth of catching up development the philosophical foundations of modern science and technology and the omission of ethics when discussing so many questions including advances in reproductive technology and biotechnology In constructing their own ecofeminist epistemology and methodology these two internationally respected feminist environmental activists look to the potential of movements advocating consumer liberation and subsistence production sustainability and regeneration and they argue for an acceptance of limits and reciprocity and a rejection of exploitation the endless commoditization of needs and violence

Aquananotechnology David E. Reisner, T. Pradeep, 2014-09-24 The world s fresh water supplies are dwindling rapidly even wastewater is now considered an asset By 2025 most of the world s population will be facing serious water stresses and shortages Aquananotechnology Global Prospects breaks new ground with its informative and innovative introduction of the application of nanotechnology to the remediation of contaminated water for drinking and industrial use It provides a comprehensive overview from a global perspective of the latest research and developments in the use of nanotechnology for water purification and desalination methods The book also covers approaches to remediation such as high surface area nanoscale media for adsorption of toxic species UV treatment of pathogens and regeneration of saturated media with applications in municipal water supplies produced water from fracking ballast water and more It also discusses membranes desalination sensing engineered polymers magnetic nanomaterials electrospun nanofibers photocatalysis endocrine disruptors and Al13 clusters It explores physics based phenomena such as subcritical water and cavitation induced sonoluminescence and fog harvesting With contributions from experts in developed and developing countries including those with severe contamination such as China India and Pakistan the book s content spans a wide range of the subject areas that fall under the aquananotechnology banner either squarely or tangentially The book strongly emphasizes sorption media with broad application to a myriad of contaminants both geogenic and anthropogenic keeping in mind that it is not enough for water to be potable it must also be palatable
