Uriels Machine:

Uriel's Machine Christopher Knight, Robert Lomas, 2000 What if science and writing developed from an advanced prehistoric civilization in the British Isles What if written evidence in the Dead Sea Scrolls records megalithic history in Western Europe and provides the plans for a machine that could rebuild civilization following a global catastrophe In *Uriel's Machine* Christopher Knight and Robert Lomas offer new evidence that our planet was hit by seven mountain sized lumps of comet creating a series of giant waves that ripped across the globe They show how a civilization emerged and was able to build an international network of sophisticated astronomical observatories which provided accurate calendars could measure the diameter of the planet and accurately predict comet impact years in advance They reveal that this is the true purpose of the great megalithic sites in Western Europe Further they show that the Book of Enoch long a part of ancient tradition of Freemasonry but then rediscovered among the Dead Sea Scrolls contains precise details of the building of a machine in the reconstruction of a shattered world Jacket

Uriel's Machine Christopher Knight, Robert Lomas, 2001-08-01 Modern scientific investigations show that Earth has been hit many times by objects such as comets and meteorites Laboratory work on comet impact effects demonstrates that comets could cause tidal waves to exceed three miles tall and near 400 miles per hour In the last 10 000 years there have been two impacts of such proportion a seven fold impact into all the world's oceans around 7640 B C and a single impact into the Mediterranean Sea about 3150 B C the time of Noah's Flood *Uriel's Machine* proves ancient Europeans not only survived the 7640 B C flood but developed a highly advanced civilization dedicated to predicting and preparing for future meteoric impacts Building an international network of sophisticated astronomical observatories these ancient astronomers created accurate solar lunar and planetary calendars measured the diameter of the Earth and precisely predicted comet collisions years in advance This was the true purpose of megalithic structures such as Stonehenge In 3150 B C the ancients predictions proved true and their device *Uriel's Machine* allowed the reconstruction of civilization in a shattered world *Uriel's Machine* also presents evidence that There was a single global language on Earth A single female was a common ancestor to all living humans Angels bred with human women to create The Watchers giant half human beings The oral tradition of Freemasonry records real events A fascinating study of humankind's past present and future *Uriel's Machine* proves the world was indeed flooded but survived wholly due to these ancient Europeans their heavenly knowledge and one remarkable machine

overview This book is the result of common efforts and interests by several scholars teachers and students on subjects that are connected with the theory of machines and mechanisms In fact in this book there is a certain teaching aim in addition to a general historical view that is more addressed to the achievements by homo faber than to those by homo sapiens since the proposed history survey has been developed with an engineering approach The brevity of the text added to the fact that the authors are probably not com tent to tackle historical studies with the necessary rigor means the content of the book is inevitably incomplete but it nevertheless attempts to fulfil three basic aims First it is hoped that this book may provide a stimulus to promote interest in the study of technical history within a mechanical engineering context Few are the co tries where anything significant is done in this area which means there is a general lack of knowledge of this common cultural heritage
