String Figures:

String Figures Caroline Furness Jayne,1906 *String Figures as Mathematics?* Eric Vandendriessche,2015-01-02 This book addresses the mathematical rationality contained in the making of string figures It does so by using interdisciplinary methods borrowed from anthropology mathematics history and philosophy of mathematics The practice of string figure making has long been carried out in many societies and particularly in those of oral tradition It consists in applying a succession of operations to a string knotted into a loop mostly using the fingers and sometimes the feet the wrists or the mouth This succession of operations is intended to generate a final figure The book explores different modes of conceptualization of the practice of string figure making and analyses various source material through these conceptual tools it looks at research by mathematicians as well as ethnographical publications and personal fieldwork findings in the Chaco Paraguay and in the Trobriand Islands Papua New Guinea which all give evidence of the rationality that underlies this activity It concludes that the creation of string figures may be seen as the result of intellectual processes involving the elaboration of algorithms and concepts such as operation sub procedure iteration and transformation

Bulletin Bernice Pauahi Bishop Museum,1928 *String Figures from Hawaii* Lyle Alexander Dickey,1928 *String Figures and How to Make Them* Caroline F. Jayne, This book may be regarded as an introduction to the study of String Figures games which are widespread among primitive peoples and played by weaving on the hands a single loop of string in order to produce intricate patterns supposed to represent certain familiar objects I have gathered together the facts already known concerning these games and adding my own studies and the unpublished records of other observers I have here described and illustrated the methods whereby about one hundred string figures are made My purpose

has been twofold to interest other students in the subject in order that additional figures and their methods may be collected among various tribes and races and to reach a still larger public that more people may share in the fascinations of the games themselves The games are certainly fascinating appealing as they do to young and to old and to those debarred from all pastimes demanding physical exertion Moreover they are not unduly difficult and capable as they are of infinite variations their charm ought to be inexhaustible
