software practitioners describe important working systems highlighting their problems and successes techniques for large system development and maintenance including project management quality management incremental delivery system security in dependent V Professor John McDermid of the University of York on Systems Engineering Environments for High Integrity Systems The remaining papers deal with reports on existing systems starting with Professor Warboys keynote paper approaches to large systems development methods for large systems maintenance and the expected impact of current research

Software Reuse and Reverse Engineering in Practice Patrick A. V. Hall,1992

Sixth European Conference on Software Maintenance and Reengineering Tibor Gyimóthy,Fernando Brito e Abreu,2002 Proceedings of a March 2002 conference held in Budapest providing an international forum for discussion and exchange of experience between researchers and practitioners Twenty eight contributions are arranged in sections on software maintenance architectural design recovery source code analysis

Software Engineer's Reference Book John A McDermid,2013-10-22

Software Engineer s Reference Book provides the fundamental principles and general approaches contemporary information and applications for developing the software of computer systems The book is comprised of three main parts an epilogue and a comprehensive index The first part covers the theory of computer science and relevant mathematics Topics under this section include logic set theory Turing machines theory of computation and computational complexity Part II is a discussion of software development methods techniques and technology primarily based around a conventional view of the software life cycle Topics discussed include methods such as CORE SSADM and SREM and formal methods including VDM and Z Attention is also given to other technical activities in the life cycle including testing and prototyping The final part describes the techniques and standards which are relevant in producing particular classes of application The text will be of great use to software engineers software project managers and students of computer science

Static Analysis for a Software Transformation Tool John David Morgenthaler,1997

Software Re-use, Utrecht 1989 Liesbeth M. Dusink,Patrick A.V. Hall,1991-05-29 This volume contains the papers revised after the workshop had taken place together with the reports of the parallel sessions from the Software Re use Workshop held in Utrecht from 23 24 November 1989 Members of the leading research teams from Europe were invited to the workshop to present short papers The various researchers approaches were debated in the parallel sessions on domain analysis on component engineering including reverse engineering and on the development of software from re usable components Re use of software may be defined as a means to support the construction of new programs using in a systematic way existing designs design fragments program texts documentation or other forms of program representation This excludes porting and maintenance because these activities are based on keeping the same software in a changing hardware or software environment Software re use is sometimes regarded as a solution to the software crisis by both improving software quality and reducing costs and timescales However although the idea is simple there are technical problems to be overcome including standard de scription of components methods for generic

components use for reverse engineering library organisation for easy retrieval methods for design using components and how to use knowledge of the underlying domains The book starts with an introduction to software re use and has a comprehensive bibliography merged from those accumulated at Delft and Brunel The book provides an excellent state of the art summary of software re use which will be of interest to software engineers and postgraduate students who need a rapid introduction to software re use and its main research issues together with the results of current research from teams across Europe
