## **Streamlining Space Launch Range Safety:**

Streamlining Space Launch Range Safety National Research Council, Commission on Engineering and Technical Systems, Aeronautics and Space Engineering Board, Committee on Space Launch Range Safety, 2000-04-15 The U S space program is rapidly changing from an activity driven by federal government launches to one driven by commercial launches In 1997 for the first time commercial launches outnumbered government launches at the Eastern Range ER located at Cape Canaveral Air Station Florida Commercial activity is also increasing at the Western Range WR located at Vandenberg Air Force Base California The government itself is emulating commercial customers shifting from direct management of launch programs to the purchase of space launch services from U S commercial launch companies in an open competitive market The fundamental goal of the U S space program is to ensure safe reliable and affordable access to space Despite the inherent danger of space launches the U S space program has demonstrated its ability to protect the public No launch site worker or member of the general public has been killed or seriously injured in any of the 4 600 launches conducted at the ER and WR during the entire 50 year history of the space age Streamlining Space Launch Range Safety discusses whether range safety processes can be made more efficient and less costly without compromising public safety This report presents six primary recommendations which address risk management Africa gates roles and responsibilities range safety documentation EWR 127 1 global positioning system GPS receiver tracking systems and risk standards for aircraft and ships *Space Safety Regulations and Standards* Joseph N. Pelton, Ram Jakhu, 2010-09-16 When international rules and regulations governing space travel were first being developed only a few countries had any space presence and commercial space activity was non-existent Today over 50 countries have on orbit satellites and commercial space presence is essential to commercial telecommunications and broadcasting yet international space law remains in its infancy *Space Safety Regulations and Standards* is the definitive book on regulatory initiatives involving space safety new space safety standards and safety related to new space technologies under development More than 30 world experts come together in this book to share their detailed knowledge of regulatory and standard making processes in the area combining otherwise disparate information into one essential reference and providing case studies to illustrate applications throughout space programs internationally They address the international regulatory framework that relates to traditional space safety programs as well as the emerging regulatory framework that relates to commercial space programs space tourism and efforts to create commercial space station facilities Fully endorsed by the International Association for the Advancement of Space Safety IAASS and provides the only definitive reference on regulations and standards for the field of space safety Combines the technical legal and regulatory information in a clear and integrated reference work suitable for technical professionals regulators legal experts and students in the field Presents a truly global insight from experienced space safety experts worldwide with representatives from the leading associations institutions and companies operating in the arena today **Range**
