Talking Ape How Language Evolved:

The Talking Ape Robbins Burling, 2005-08 Robbins Burling traces language back to its earliest origins among our distant ape like forbears several million years ago He examines the qualities of mind and brain needed to support the operations of language investigates the first links between signs sounds and meanings explores the beginnings and prehistories of vocabulary and grammar and connects work in field such as linguistics evolutionary biology and archaeology And he does all this in a style that is crystal clear constantly enlivened by wit and humour In this mind opening book Robbins Burling presents the most convincing and the most readable account of the origins of language yet published He sheds new light on how language affects the way we think behave and relate to each other and he gives us a deeper understanding of the nature of language itself The author traces language back to its earliest origins among our distant ape like forbears several million years ago He offers a new account of the route by which we acquired our defining characteristic and explores the changing nature of language as it developed through the course of our evolution He considers what the earliest forms of communication are likely to have been how they worked and why they were deployed He examines the qualities of mind and brain needed to support the operations of language and the advantages they offered for survival and reproduction He investigates the beginnings and prehistories of vocabulary and grammar and connects work in fields extending from linguistics sign languages and psychology to palaeontology evolutionary biology and archaeology And he does all this in a style that is crystal clear constantly enlivened by wit and humour *Language and Imaginability* Horst Ruthrof, 2014-03-25 *Language and Imaginability* pursues the hypothesis that natural language is fundamentally heterosemiotic combining as it does the symbolicity of word sounds with the iconicity of motivated signifieds conceived as socially organized mental events Viewed phenomenologically language is regarded as an ontically heteronomous construct performed by speakers within the boundaries of sufficient semiosis under the control of the speech community From both angles a commitment to some form of intersubjective mentalism appears unavoidable This the author argues forces us to conclude that imaginability plays a central role in the constitution of linguistic meanings as indirectly public phenomena The book argues this case by comparing two main avenues along which the theorization of language has been pursued in the Western tradition since Aristotle via resemblance relations and propositional accounts Locke Kant Peirce Husserl and cognitive linguistics are invoked on the side of resemblance and iconicity Frege Wittgenstein Davidson and other analytical philosophers up to intensional semantics are interpreted in terms of their relation to imaginability The book also addresses the ambivalence vis vis iconicity which we find in much of linguistics in brain research and evolutionary accounts as well as in pragmatics The study ends on a series of redefinitions of concepts at the heart of the theorization of language **Why We Talk** Jean-Louis Dessalles, 2007-01-04 Constant exchange of information is integral to our societies The author explores how this came into being Presenting language evolution as a natural history of conversation he sheds light on the emergence of communication in the hominine

congregations as well as on the human nature

[The Dawn of Language](#) Sverker Johansson, 2021-09-02 A model of popular science writing STEVEN POOLE Who was the first speaker and what was their first message An erudite tightly woven and beautifully written account of one of humanity's greatest mysteries the origins of language Drawing on evidence from many fields including archaeology anthropology neurology and linguistics Sverker Johansson weaves these disparate threads together to show how our human ancestors evolved into language users The Dawn of Language provides a fascinating survey of how grammar came into being and the differences or similarities between languages spoken around the world before exploring how language eventually emerged in the very remote human past Our intellectual and physiological changes through the process of evolution both have a bearing on our ability to acquire language But to what extent is the evolution of language dependent on genes or on environment How has language evolved further and how is it changing now in the process of globalisation And which aspects of language ensure that robots are not yet intelligent enough to reconstruct how language has evolved Johansson's far reaching authoritative and research based approach to language is brought to life through dozens of astonishing examples both human and animal in a fascinatingly erudite and entertaining volume for anyone who has ever contemplated not just why we speak the way we do but why we speak at all Translated from the Swedish by Frank Perry

Self-organization in the evolution of speech Pierre-Yves Oudeyer, 2006 Speech is the principal supporting medium of language In this book Pierre Yves Oudeyer considers how spoken language first emerged He presents an original and integrated view of the interactions between self organization and natural selection reformulates questions about the origins of speech and puts forward what at first sight appears to be a startling proposal that speech can be spontaneously generated by the coupling of evolutionarily simple neural structures connecting perception and production He explores this hypothesis by constructing a computational system to model the effects of linking auditory and vocal motor neural nets He shows that a population of agents which used holistic and unarticulated vocalizations at the outset are inexorably led to a state in which their vocalizations have become discrete combinatorial and categorized in the same way by all group members Furthermore the simple syntactic rules that have

emerged to regulate the combinations of sounds exhibit the fundamental properties of modern human speech systems This original and fascinating account will interest all those interested in the evolution of speech **Linguistics and Language**

Behavior Abstracts ,2009-02 **Just Another Ape?** Helene Guldborg,2010 This book argues to the contrary that animals are more like humans than humans are indeed unique and that the evidence for apes having human like mental capacities is weak and getting weaker **Missiology** ,2008 An international review Journal of the Philosophy of Sport ,2007

Linguistic Structures Harry van der Hulst,2008 **Eden's Garden** Richard J. Coleman,2007 In Eden's Garden Rethinking Sin and Evil in an Era of Scientific Promise Richard Coleman examines the notion of sin in a contemporary world that values scientific and nonreligious modes of thought regarding human behavior This work is not an anti science polemic but rather an argument to show how sin and evil can make sense to the nonreligious mind and how it is valuable to make sense of such phenomena Examining themes in religion philosophy and theology it is ideal for use in the numerous courses which move across these disciplines **Studies in Language and Cognition** Jordan Zlatev,2009 Using various concepts

theories and methods this book describes theoretical and empirical studies that are united in their approach of treating language not in isolation but as both based on structures and processes of cognition and at the same time as affecting the human mind Anthropological Linguistics ,1959 Manuscripta ,2008 Psychology G. Neil Martin,2008-08-07 Can personality and intelligence be measured Is being physically attractive an advantage Is it really better to forgive and forget How do babies learn to perceive and think Can listening to Mozart improve IQ What happens when we sleep Attempting to answer these important questions and more psychology the scientific study of human and nonhuman behaviour has never been more popular From TV experts to the amateur musings of your best friend the language of psychology has permeated all aspects of everyday life Here the author proves that modern psychology concerns far more than the everyday stereotypes of Freud Jung and common sense advice Exploring the senses how memory works and what determines our intelligence and personality this Beginner's Guide is informed by the latest cutting edge research and provides a vibrant and witty examination of the very heart of what it is to be human Dr G Neil Martin is Reader in Psychology a Fellow of the RSA a Chartered Scientist and Director of the Human Olfaction Laboratory at Middlesex University UK He has written several books on psychology and neuroscience co authored the first online course in introductory psychology in Europe and has written over 150 articles for The Psychologist The Times The Observer and the Annals of Improbable Research amongst others His research focuses on the psychology of smell and taste the perception and understanding of psychology and the psychology of humour **Love Ya Hate Ya** J. Normann Jørgensen,2010 This volume shows the formidable range of variation in youth language Youth language is analyzed as a phenomenon in negotiations of identities and social relations The contributions particularly concentrate on youth language in late modern urban societies This is an area of study which has been gaining increasing attention in sociolinguistics over the past few years One observation that is almost inevitable is that

there is a string of similarities to be found between youths in quite different circumstances ranging from university students in Argentina to juvenile delinquents in Greece and to skaters in Greenland A wide range of language situations are covered from Danish Cypriot Greek Turkish to Spanish Greenlandic Norwegian Catalan and of course English The articles in this anthology document and analyze linguistic youth styles and behaviors as well as attitudes In their totality they present a picture of youth language as functional socially valuable and flexible with a special emphasis on identity negotiations
