is going back to traditional methods of growing vegetables in a healthy manner We are not talking about chemical fertilizers and poisonous pesticides Instead we are going to talk about natural manure compost and other traditional methods used by our forefathers to get a good healthy crop for family and neighbors Many people out there would not want to grow all kinds of vegetables because hey how many of us like eating greens But then the moment we see them growing in our gardens and we pluck our first harvest we begin to think in terms of healthy eating especially when the meals have been made of organic vegetables grown in our own backyard Your main priority is to see that the ground is fully occupied for most of the year and that no part of your garden is wasted Think Japanese gardens They know how to utilize every single inch of space and get the most out of it All right you may see their gardens on a small scale but no inch of soil in a farm is left uncultivated if they can help it This may look crowded but it is not So let us consider ourselves gardening newbies and begin our journey towards achieving the goal of the perfect long term organic vegetable kitchen garden right now Remember that your kitchen garden is not going to be restricted to just vegetables You can also grow herbs in it Who is stopping you from growing flowers in it Your aim is to plan your kitchen garden in such a way that you gain lots of pleasure from it and then you may decide to carry on to the profit stage
