Green Building Ideas:

Youth Entrepreneurship and Africa's Sustainable Industrialization Farai Kapfudzaruwa, Masafumi Nagao, Emmanuel Mutisya, 2018-10-18 This book investigates the prospects of Africa's sustainable industrialization with an emphasis on youth entrepreneurship and the mechanisms in place to support both industrial and corporate entrepreneurs. The volume addresses two specific issues: first, industrialization and youth entrepreneurship; and secondly, youth entrepreneurship training and education. The emphasis on youth entrepreneurship to drive sustainable industrialization in Africa is driven by three points: first, Africa's industrialization is still at its inception with severely limited existing stock of entrepreneurial talents which makes it imperative to look to the continent's bulging youth population, the population dividend, for the needed supply of successive generations of entrepreneurs. Secondly, sustainable industrialization would have to be oriented to green ICT and inclusive growth which calls for a change in entrepreneurs' attitudes. Finally, at the centre of the Africa Rising narrative is a budding new cheetah generation of young entrepreneurs who are highly educated, professional, and motivated by the need to set up new business models and practices to compete in the Fourth Industrial Revolution. This volume forms part of an Education for Sustainable Development in Africa (ESDA) book series involving the United Nations University Institute for the Advanced Study of Sustainability and 8 partner African universities running Master's Programs in sustainable development. The book series is intended to serve primarily as undergraduate and graduate instruction materials for courses on sustainable development in Africa as well as policy input to key developmental issues in Africa.

Governing Technology for Sustainability Joseph Murphy, 2012 In a world of growing complexity and dwindling resources, the relationship between technology and sustainability is a pressing issue of concern at the highest levels. This book improves our understanding by examining the ways that people, technology, and governance shape each other with implications for sustainability. It is the first book to link technology studies and governance research to this problem. Contributions from leading environmental social scientists are included with each chapter reporting on new research and tackling complex but vital issues. Drawing on examples such as wave and tidal power, wind power, micro-generation, community waste recycling, and eco-housing, the book provides powerful new insights into the governance of technology for sustainability. A detailed introduction and conclusion discuss existing research directions and identify the contribution that the book makes in advancing our understanding of the people-technology-governance nexus and its implications for sustainability. This is essential reading for all those in academia, government, and industry working at the critical interface between how we develop, deploy, and govern technology in the pursuit of sustainability.

The Global Forest Sector Eric Hansen, Rajat Panwar, Richard Vlosky, 2013-12-04 Changes in production, demand, supply, and trade patterns; the impact of green building and bioenergy on industry practices and policy; infrastructure and new economies with production advantages and large consumption bases; all present challenges and opportunities in the forest sector. With contributions from leading experts in academia and profess

Toward Sustainable

Journal of Green Building ,2006

American Magazine ,1929

This book delves into Green Building Ideas. Green Building Ideas is a vital topic that must be grasped by everyone, ranging from students and scholars to the general public. This book will furnish comprehensive and in-depth insights into Green Building Ideas, encompassing both the fundamentals and more intricate discussions.

1. This book is structured into several chapters, namely:

- Chapter 1: Introduction to Green Building Ideas
- Chapter 2: Essential Elements of Green Building Ideas
- Chapter 3: Green Building Ideas in Everyday Life
- Chapter 4: Green Building Ideas in Specific Contexts
- Chapter 5: Conclusion

2. In chapter 1, this book will provide an overview of Green Building Ideas. This chapter will explore what Green Building Ideas is, why Green Building Ideas is vital, and how to effectively learn about Green Building Ideas.
3. In chapter 2, this book will delve into the foundational concepts of Green Building Ideas. This chapter will elucidate the essential principles that need to be understood to grasp Green Building Ideas in its entirety.
4. In chapter 3, this book will examine the practical applications of Green Building Ideas in daily life. This chapter will showcase real-world examples of how Green Building Ideas can be effectively utilized in everyday scenarios.
5. In chapter 4, this book will scrutinize the relevance of Green Building Ideas in specific contexts. The fourth chapter will explore how Green Building Ideas is applied in specialized fields, such as education, business, and technology.
6. In chapter 5, the author will draw a conclusion about Green Building Ideas. The final chapter will summarize the key points that have been discussed throughout the book.

This book is crafted in an easy-to-understand language and is complemented by engaging illustrations. It is highly recommended for anyone seeking to gain a comprehensive understanding of Green Building Ideas.
