Local Climate Action Planning Michael R. Boswell, Adrienne I. Greve, Tammy L. Seale, 2012-07-16 Climate change is a global problem but the problem begins locally. Cities consume 75% of the world's energy and emit 80% of the world's greenhouse gases. Changing the way we build and operate our cities can have major effects on greenhouse gas emissions. Fortunately, communities across the U.S. are responding to the climate change problem by making plans that assess their contribution to greenhouse gas emissions and specify actions they will take to reduce these emissions. This is the first book designed to help planners, municipal staff and officials, citizens and others working at local levels to develop Climate Action Plans. CAPs are strategic plans that establish policies and programs for mitigating a community's greenhouse gas (GHG) emissions. They typically focus on transportation, energy use and solid waste and often differentiate between community-wide actions and municipal agency actions. CAPs are usually based on GHG emissions inventories which identify the sources of emissions from the community and quantify the amounts. Additionally, many CAPs include a section addressing adaptation: how the community will respond to the impacts of climate change on the community such as increased flooding, extended drought or sea level rise. With examples drawn from actual plans, *Local Climate Action Planning* guides preparers of CAPs through the entire plan development process, identifying the key considerations and choices that must be made in order to assure that a plan is both workable and effective. *Building Healthy Places Toolkit* Urban Land Institute, 2015. This project was made possible through the generous financial support of the Colorado Health Foundation. Additional support for the ULI Building Healthy Places Initiative has been provided by the estate of Melvin Simon. **Toward Sustainable Communities** Mark Roseland, 2012-07-17. Helps citizens and their governments apply the concept of sustainable development in their communities.
