*Proceedings of the International Conference on Recent Advances in Artificial Intelligence for Sustainable Development (RAISD 2025)* Piyush Ranjan, Sumit Kumar Pandey, Kailash Pati Dutta, Md. Irfan Alam, 2025-07-17 This open access volume presents select proceedings of Recent Advances in Artificial

Intelligence for Sustainable Development RAISD      *Organic Futures* Connor J. Fitzmaurice, Brian J. Gareau, 2016-01-01 An exploration of the lived experience of small scale organic farmers in New England that unpacks how they balance their ideals with economic realities In recent years the popularity of organically grown produce has exploded In 2014 organic fruits and vegetables accounted for 12% of all produce sales in the United States with 39 billion in consumer sales reported for 2015 As a federally recognized niche market within the agricultural mainstream organic farming is increasingly on display in American grocery stores Yet the organic food most Americans consume today is produced by an industrial food system at odds with the practices and ideals of small scale farmers Taking an ethnographic approach the fieldwork by Connor Fitzmaurice and Brian Gareau at a small New England organic farm sheds light on how farmers navigate the difficult terrain between practices of sustainability and the economic realities of contemporary agriculture Drawing on extensive research Fitzmaurice and Gareau examine the historical context complexities and viability of nonconventional organic farming practices practices that seek to balance ecology and community with the business of agriculture      New Technologies and Environmental Innovation Joseph Huber, 2004-01-01 Joseph Huber s book contains a wealth of information on technological environmental innovations The scrutiny of this material leads to powerful conclusions with which scholars should concern themselves Highly recommended Ren Kemp Maastricht University The Netherlands This timely and impressive volume brings technology back into the centre of discussions and debates on environmental reform In articulating an ecological modernisation perspective Joseph Huber presents an inspiring optimistic and at times provocative assessment of the potential and future role of radical technological innovations in greening production consumption cycles Arthur P J Mol Wageningen University The Netherlands In this insightful book Joseph Huber investigates the life cycle analysis of technological and environmental innovations TEIs TEIs are new technologies products and practices which have benign environmental effects and which can increase eco efficiency More importantly they can also improve metabolic consistency thus laying the foundations for a sustainable industrial ecology      **The New Farm** ,1995      *A Green and Permanent Land* Randal S. Beeman, James A. Pritchard, 2001 Once patronized primarily by the counterculture and the health food establishment the organic food industry today is a multi billion dollar business driven by ever growing consumer demand for safe food and greater public awareness of ecological issues Assumed by many to be a recent phenomenon that industry owes much to agricultural innovations that go back to the Dust Bowl era This book explores the roots and branches of alternative agricultural ideas in twentieth century America showing how ecological thought has challenged and changed agricultural theory practice and policy from the 1930s to the present It introduces us to the people and institutions who forged alternatives to industrialized agriculture through a deep concern for the enduring fertility of the soil a passionate commitment to human health and a strong advocacy of economic justice for farmers Randal Beeman and James Pritchard show that agricultural issues were central to the rise of the environmental movement in the United States As family farms

failed during the Depression a new kind of agriculture was championed based on the holistic approach taught by the emerging science of ecology Ecology influenced the permanent agriculture movement that advocated such radical concepts as long term land use planning comprehensive soil conservation and organic farming Then in the 1970s sustainable agriculture combined many of these ideas with new concerns about misguided technology and an over consumptive culture to preach a more sensible approach to farming In chronicling the overlooked history of alternative agriculture A Green and Permanent Land records the significant contributions of individuals like Rex Tugwell Hugh Bennett Louis Bromfield Edward Faulkner Russell and Kate Lord Scott and Helen Nearing Robert Rodale Wes Jackson and groups like Friends of the Land and the Practical Farmers of Iowa And by demonstrating how agriculture also remains central to the public interest especially in the face of climatic crises genetically altered crops and questionable uses of pesticides this book puts these issues in historical perspective and offers readers considerable food for thought
