How Children Learn from Parents and Parenting Others in Formal and Informal Settings: International and Cultural Perspectives, 2nd Edition Yvette Renee Harris, Claudio Longobardi, 2020-07-28 For several decades parent child cognitive interaction researchers have acknowledged that children learn cognitive skills in the context of their social and early environments These cognitive skills

are often imparted to the children by parents or parenting others in formal or informal settings. Thus, for example, such informal settings as dinner table conversations, walks through grocery stores, museums, or neighborhoods become rich laboratories for children to learn varied cognitive skills ranging from numeracy concepts and language. The way in which those learning opportunities are provided by parents, structured by parents, and scaffolded by parents may well vary depending on culture and other socio-demographic variables and may well vary depending on formal or informal settings. The aim of this Research Topic is to bring together scholarship from both global north and global south contexts which explores how children learn via parental involvement in formal and informal settings.

Publisher's note: In this 2nd edition, the following article has been added: Harris YR and Longobardi C (2020) Editorial: How Children Learn From Parents and Parenting Others in Formal and Informal Settings: International and Cultural Perspectives. *Front Psychol* 11:1026. doi: 10.3389/fpsyg.2020.01026
