Strategic Planning In Environmental Regulation A Policy Approach That Works:

Strategic Planning in Environmental Regulation Steven Cohen, Sheldon Kamieniecki, Matthew Alan Cahn, 2005

Demonstrates how to increase the effectiveness of environmental regulation by adopting a strategic approach to regulatory planning providing a theoretical model and two case studies Strategic Planning in Environmental Regulation introduces an approach to environmental regulatory planning founded on a creative interactive relationship between business and government The authors argue that regulation often too narrowly defined as direct command and control standard setting and enforcement should include the full range of activities intended to influence private behaviour to conform to public goals The concept of strategic regulatory planning that the book introduces provides a model for designing more effective environmental regulation Strategic planning requires careful consideration of the regulatory objectives the target audiences for regulation and the characteristics of the regulatory agency The two important case studies in the book one on the use of the gasoline additive MTBE and the other on the cleanup of underground storage tanks USTs apply the model compare the approaches and results and illustrate the advantages of a strategic approach gasoline was found to contribute to both air and groundwater pollution shows the drawbacks of top down regulation by fragmented regulatory agencies The success of the UST cleanup in contrast highlights a unique strategic and results oriented approach to policy implementation These two cases demonstrate why regulation works better in some cases than others and the alternative approaches to regulation described in the book promise to promote the achievement of environmental quality goals

Environmental Governance Reconsidered, second edition Robert F. Durant, Daniel J. Fiorino, Rosemary O'Leary, 2017-08-25 Key topics in the ongoing evolution of environmental governance with new and updated material This survey of current issues and controversies in environmental policy and management is unique in its thematic mix broad coverage of key debates and in depth analysis The contributing authors all distinguished scholars or practitioners offer a comprehensive examination of key topics in the continuing evolution of environmental governance with perspectives from public policy public administration political science international relations sustainability theory environmental economics risk analysis and democratic theory The second edition of this popular reader has been thoroughly revised with updated coverage and new topics The emphasis has shifted from sustainability to include sustainable cities from domestic civic environmentalism to global civil society and from global interdependence to the evolution of institutions of global environmental governance A general focus on devolution of authority in the United States has been sharpened to address the specifics of contested federalism and fracking and the treatment of flexibility now explores the specifics of regulatory innovation and change New chapters join original topics such as environmental justice and collaboration and conflict resolution to address highly salient and timely topics energy security risk assessment communication and technology innovation regulation by revelation and retrospective regulatory analysis The topics are organized and integrated by the book's 3R framework reconceptualizing governance to reflect ecological risks and

interdependencies better reconnecting with stakeholders and reframing administrative rationality Extensive cross references pull the chapters together A broad reference list enables readers to pursue topics further Contributors Regina S Axelrod Robert F Durant Kirk Emerson Daniel J Fiorino Anne J Kantel David M Konisky Michael E Kraft Jennifer Kuzma Richard Morgenstern Tina Nabatchi Rosemary O Leary Barry Rabe Walter A Rosenbaum Stacy D VanDeveer Paul Wapner The Power of Narrative in Environmental Networks Raul Lejano, Mrill Ingram, Helen Ingram, 2013-07-26 Theory and case studies demonstrate the analytic potential of mutually constitutive narrative networks in environmental governance **American Environmental Policy, updated and expanded edition** Christopher Mcgrory Klyza, David J. Sousa, 2013-08-30 An updated investigation of alternate pathways for American environmental policymaking made necessary by legislative gridlock The golden era of American environmental lawmaking in the 1960s and 1970s saw twenty two pieces of major environmental legislation including the Clean Air Act the Clean Water Act and the Endangered Species Act passed by bipartisan majorities in Congress and signed into law by presidents of both parties But since then partisanship the dramatic movement of Republicans to the right and political brinksmanship have led to legislative gridlock on environmental issues In this book Christopher Klyza and David Sousa argue that the longstanding legislative stalemate at the national level has forced environmental policymaking onto other pathways Klyza and Sousa identify and analyze five alternative policy paths which they illustrate with case studies from 1990 to the present appropriations politics in Congress executive authority the role of the courts next generation collaborative experiments and policymaking at the state and local levels This updated edition features a new chapter discussing environmental policy developments from 2006 to 2012 including intensifying partisanship on the environment the failure of Congress to pass climate legislation the ramifications of Massachusetts v EPA and other Obama administration executive actions some of which have reversed Bush administration executive actions Yet they argue despite legislative gridlock the legacy of 1960s and 1970s policies has created an enduring green state rooted in statutes bureaucratic routines and public expectations **Environmental Regulation Through Strategic Planning** Steven Cohen, Sheldon Kamieniecki, 1991-10-17 Presents a workable approach for implementing hazardous materials regulation Focusing on the development of comprehensive tactical plans the authors both veteran researchers of the EPA s regulatory procedures offer a blueprint for future environmental management programmes **Changing Climates in North American Politics** Henrik Selin, Stacy D. VanDeveer, 2009 In this age of high fuel prices and concern with continuing availability of oil scientists are working on a number of approaches to alternate fuel sources These concerns may provoke interest in how some people in gas starved Europe dealt with such problems throughout the war years 1939 1945 One of the most successful innovations were the so called gas producer vehicles that utilized the by products of solid fuel combustion employing such solids as coal charcoal turf and wood to produce fuel gas for a standard internal combustion engine This book provides an overview of such vehicles including those used by the Wehrmacht Schematics of operating systems and the

regulations concerning their use are also included along with a translated German illustrated operators manual Publisher
