Office for Subject Cataloging Policy, 2012 *The Oxford Companion to Consciousness* Tim Bayne, Axel Cleeremans, Patrick Wilken, 2009-06-04 Consciousness is undoubtedly one of the last remaining scientific mysteries and hence one of the greatest contemporary scientific challenges How does the brain's activity result in the rich phenomenology that characterizes our waking life Are animals conscious Why did consciousness evolve How does science proceed to answer such questions Can we define what consciousness is Can we measure it Can we use experimental results to further our understanding of disorders of consciousness such as those seen in schizophrenia delirium or altered states of consciousness These questions are at the heart of contemporary research in the domain Answering them requires a fundamentally interdisciplinary approach that engages not only philosophers but also neuroscientists and psychologists in a joint effort to develop novel approaches that reflect both the stunning recent advances in imaging methods as well as the continuing refinement of our concepts of consciousness In this light the Oxford Companion to Consciousness is the most complete authoritative survey of contemporary research on consciousness Five years in the making and including over 250 concise entries written by leaders in the field the volume covers both fundamental knowledge as well as more recent advances in this rapidly changing domain Structured as an easy to use dictionary and extensively cross referenced the Companion offers contributions from philosophy of mind to neuroscience from experimental psychology to clinical findings so reflecting the profoundly interdisciplinary nature of the domain Particular care has been taken to ensure that each of the entries is accessible to the general reader and that the overall volume represents a comprehensive snapshot of the contemporary study of consciousness The result is a unique compendium that will prove indispensable to anyone interested in consciousness from beginning students wishing to clarify a concept to professional consciousness researchers looking for the best characterization of a particular phenomenon [Stream of Consciousness](#) Barry Dainton, 2006 An in depth investigation into the phenomenology of conscious experience the nature of awareness introspection phenomenal space and time consciousness A fascinating and probing study **Body and mind** William McDougall, 1915 **Theatre Of The Mind** Jay Ingram, 2012-05-15 If the brain is the theatre consciousness is the play But who or what controls what we watch and how we watch it In Theatre of the Mind Jay Ingram whose past scientific investigations include the properties of honey on toast and the complexities of the barmaid's brain tackles one of the most controversial of subjects consciousness Scientists have long tried to map our brains and understand how it is that we think and are self aware but what do we really know Any discussion of the brain raises more questions than answers and Ingram illuminates some of the most perplexing ones What happens in our minds when we're driving and we suddenly realize that we don't remember the last few miles of highway How
