The Long Surprise:

Surprise Attack Ephraim KAM, Ephraim Kam, 2009-06-30 Ephraim Kam observes surprise attack through the eyes of its victim in order to understand the causes of the victim's failure to anticipate the coming of war. Emphasizing the psychological aspect of warfare, Kam traces the behavior of the victim at various functional levels and from several points of view in order to examine the difficulties and mistakes that permit a nation to be taken by surprise. He argues that anticipation and prediction of a coming war are more complicated than any other issue of strategic estimation involving such interdependent factors as analytical contradictions, judgemental biases, organizational obstacles, and political as well as military constraints. **Surprise Attack: The Victim's Perspective** offers implications based on the intelligence perspective, providing both historical background and scientific analysis that draws from the author's vast experience. The book is of utmost value to all those engaged in intelligence work and to those whose operational or political responsibility brings them in touch with intelligence assessments and the need to authenticate and then adopt them or discount them. Similarly, the book will interest any reader intrigued by decision-making processes that influence individuals and nations at war and sometimes even shape national destiny. Ehud Barak, Former Prime Minister of Israel. [Global Financial Spillovers of Chinese Macroeconomic Surprises](#) Camila Gutierrez, Javier Turen, Alejandro Vicondoa, 2025-07-04 We study how Chinese macroeconomic surprises affect global financial markets. Exploiting forecast errors around key data releases and a 60-minute window around the release, we show that positive industrial production (IP) surprises lead to immediate increases in Chinese and Asia-Pacific stock returns, global long-term yields, and commodity prices highly demanded by China. A complementary identification strategy which builds on different time zones confirms positive spillovers to international equity markets with stronger effects in countries more exposed to Chinese trade. Our results highlight the role of both Hedging Premia and Growth Expectations in driving asset price comovement. The findings highlight China's growing influence in global markets and position it as a driver of the Global Financial Cycle. **Inflicting Surprise** Mark F. Cancian, 2021-04-15 Great power competition has returned after a generation of absence and the U.S. military edge over prospective opponents is eroding. Whereas the United States previously could overwhelm adversaries with sheer force if necessary, it now needs every advantage it can get. This study analyzes how the United States might inflict surprise on its adversaries to gain a strategic advantage. Surprise is one aspect of a broader discussion in the national security literature on innovative operational concepts which may serve as force multipliers to enable the United States to get more out of existing capabilities. A follow-up to CSIS's highly successful 2018 study *Coping with Surprise in Great Power Conflicts*, this report highlights several components of a successful surprise, including exploiting adversary vulnerabilities, using intelligence and technology, employing secrecy and deception, and doing the unexpected. The report also contains over a dozen vignettes illustrating potential future surprises. **The Long Surprise** Barbara Lau, 2001 Contest Judge X J Kennedy heralds Barbara Lau's *The Long Surprise* as full of unexpectedness, feeling, and verve, and a
