**BREAKTHROUGH YOUR PLATEAU WITHOUT COUNTING A SINGLE CALORIE** What if following low-calorie diets is the reason you can't get results? Imagine a style of eating where you didn't have to count calories or use apps to track macros. Being overweight my entire childhood, all of my teenage years, and the better part of my 20s led me to try some outrageous diet and exercise strategies, but after years of struggling, I finally managed to lose 110 lb (50 kg). Now, as a personal trainer, I help people like you do the same every day. This book will include the very method I used to lose 110 lb (50 kg) so you can do the same. This book will cover:

- A Complete 30-Day Guide
- The Best Exercise For Fat Burning
- The Third MOST IMPORTANT FACTOR to burn fat Outside of Diet and Exercise
- You Were Never Told The Number One Fact You Didn't Know About Low-Calorie Diets And Much Much More

**INTERMITTENT FASTING FOR WEIGHT LOSS Preview Chapter 4: Why Low-Calorie Diets Don't Work** Have you ever tried lowering your calories to lose weight? Did it work long-term? Could you keep the weight you lost off? If you're reading this book, my guess is that it didn't, and you're not alone. Data from the UK show 1 in 124 obese women get results using this method, meaning the nutrition guidelines some professionals are following have a 99.5% fail rate. A quick goggle of what happened to the contestants on the hit TV series *The Biggest Loser* should be enough to put you off this method. This show is a classic example of why moving more and eating less only works in the short term, if at all. There is a reason there are few reunion shows. So why are low-calorie diets flawed? A study on 14 contestants on the *Biggest Loser* show revealed some alarming results six years after filming had finished. The initial results were impressive, but as the study showed, they were short-lived. Below are results of some of the factors tested:

| Factor                                    | Value           |
|---|-----------------|
| Weight Average weight before filming      | 328 lb (148 kg) |
| Average weight after 30 weeks on the show | 199 lb (90 kg)  |
| Average weight six years after final      | 290 lb (131 kg) |

As you can see, contestants lost a massive amount of weight during filming but struggled to maintain the weight loss over a long period of time. Download now to find out why the contestants couldn't keep the weight off and how to prevent it happening to you.
