growing movement of modifying the human body as it is right now      **The Playful Citizen** René Glas, Sybille Lammes, Michiel Lange, Joost Raessens, Imar Vries, 2025-10-01 In the last decade digital media technologies and developments have given rise to exciting new forms of ludic or playful engagements of citizens in cultural and societal issues From the Occupy movement to playful city making to the gameful designs of the Obama 2008 and Trump 2016 presidential campaigns and the rise of citizen science and ecological games this book shows how play is a key theoretical methodological and practical principle for comprehending such new forms of civic engagement in a mediatized culture The Playful Citizen explores how and through what media we are becoming more playful as citizens and how this manifests itself in our ways of doing living and thinking We offer a pluralistic answer to such questions by bringing together scholars from different fields such as game and play studies social sciences and media and culture studies      **The Gospel of Wellness** Rina Raphael, 2022-09-20 Next level revelatory Sarah Knight New York Times bestselling author of The Life Changing Magic of Not Giving a F ck Excellent Rina really knows her shit I m so thankful for this book Jameela Jamil actress and host of I Weigh Journalist Rina Raphael looks at the explosion of the wellness industry how it stems from legitimate complaints how seductive marketing targets hopeful consumers and why women are opening up their wallets like never before Wellness promises women the one thing they desperately desire control Women are pursuing their health like never before Whether it s juicing biohacking clutching crystals or sipping collagen today there is something for everyone as the wellness industry has grown from modest roots into a 4 4 trillion entity and a full blown movement promising health and vitality in the most fashionable package But why suddenly are we all feeling so unwell The truth is that deep within the underbelly of self care hidden beneath layers of clever marketing wellness beckons with a far stronger more seductive message than health alone It promises women the one thing they desperately desire control Vividly told and deeply reported The Gospel of Wellness reveals how this obsession is a direct result of women feeling dismissed mistreated and overburdened Women are told they can manage the chaos ruling their life by following a laid out plan eat right exercise meditate then buy or do all this stuff And while wellness may have sprung from good intentions we are now relentlessly flooded with exploitative offerings questionable ideas and a mounting pressure to stay devoted to the divine doctrine of wellness What happens when the cure becomes as bad as the disease With a critical eye humor and empathy wellness industry journalist Rina Raphael examines how women have been led down a kale covered path promising nothing short of salvation She knows Raphael was once a disciple herself trying everything from clean eating to electric shock workouts until her own awakening to the troubling consequences Balancing the good with the bad The Gospel of Wellness is a clear eyed exploration of what wellness can actually offer us knocking down the false idols and commandments that have taken hold and ultimately showing how we might shape a better future for the movement and for our well being      *Biohackers Magazine Issue 17* , When one experiences a new product a new treatment or a new idea there s little that compares to the feelings of excitement and hope

that rush in fueling one's faith in the upright direction of humanity I just recently attended the 8th Annual Biohacking Conference hosted by Dave Asprey in LA and like each biohacking event I left feeling inspired to say the least Everything I saw every person I met and every biohack I experienced further fed my appetite to share these great ideas and practices with the world a world hungering for the opposite approach of industrialized medicine Now of course not every biohack is exactly 100% proven Suffice it to say there are many that are still in the process of collecting data from studies and clinical trials However those that have stood up to the modern pill popping regimes and have adamantly supported their ideas on the foundations of strong scientific data are truly examples to be held in high regard I was impressed with the many products and companies at the conference that held a mission of dedicated service to fellow mankind Yes like in any startup industry or even industry for that matter there are those who are looking to push some falsehood to scheme people into buying their product or services But as we know the companies that rise to the top are those that stick to the cardinal virtues that make up all of us Prudence Justice Fortitude and Temperance The Biohacking Industry is outgrowing its mold and soon a new layer of enthusiasts will be added This is something that should enthrall us but it shouldn't permit us to lose sight of the foundational attributes that make and will continue to make us biohackers for the rest of our lives Essentially we are all after freedom freedom from disease freedom from injury freedom from hysteria and freedom from aging Responsible Biohacking is perhaps the best way towards that freedom and we must continually adjust our sails to catch the winds that stem from truth and service That is what we at Biohackers Magazine strive towards serving the community through the provision of information carefully discerned and attuned to the values of sincerity and science
