

# Does Size Matter?

If penis size is important, it seems to be more so for men than for women.

Unfortunately, society pressures us through messages like "size matters".

**But when it comes to sex and intimacy, size doesn't really matter as much as you might think.**

According to a study conducted by researchers at the University of California, Los Angeles (UCLA) and California State University

When we talk about penis size, the focus leaves out another and maybe more important measurement: **girth**.

**85%**  
of women

Are satisfied with the size of their partner's penis.

**90%**  
of women

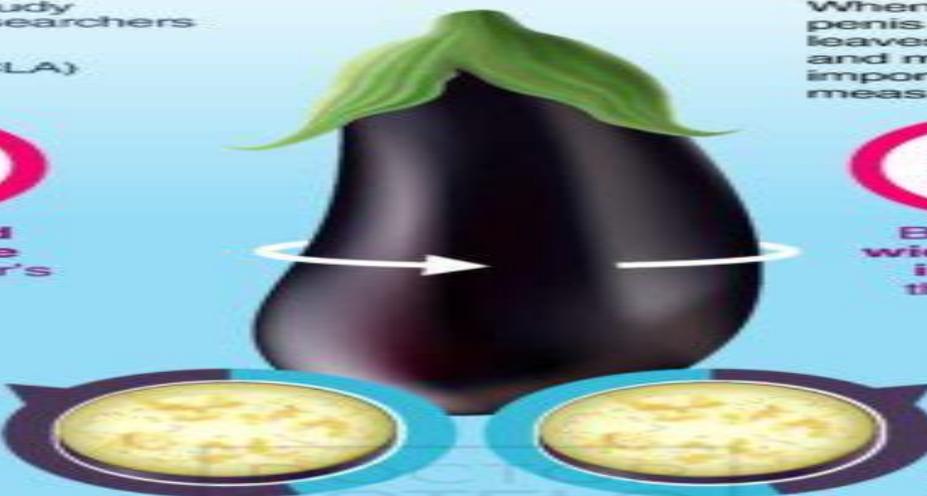

Believe that width is more important than length.

**55%**  
of men

are satisfied with their penis size.

**45%**  
want to be larger.

Only 0.2% want to be smaller.

Penis length doesn't matter as much as you may have been led to believe when it comes to the physiology of heterosexual penetration.

A woman's vaginal canal contains lots of nerve endings that are receptive to touch.

The majority of these nerve endings are in the outer one-third of the vagina, so 5 inches is plenty long to reach and stimulate that section.

- In general, women believe that girth is more important than length. Physiologically this may be explained by the fact that the clitoris is mostly internal, made up of erectile tissue that surrounds the inside of the vagina. When a woman gets aroused, the tissue fills with blood, similar to the penis.
- The engorged tissue surrounds the inside of the vaginal wall. When the penis applies pressure to the erectile tissue, it stimulates the clitoral nerves, pleasuring the woman.

Even with all the explained above:

In the end, it's not the size of your penis that matters as much as what you do with it when it comes to satisfying your partner.

Figuring out what feels good for you and your partner and choosing moves that make the most of your penis type will serve you better than worrying about its sizes.

Size Matters, So Does Duration Zhenyu Hu,2020 This paper investigates the interplay between offer size and offer deadline in a Stackelberg game involving a proposer and responder The proposer acts first by making an offer to the responder with a deadline and the responder concurrently following a continuous time finite horizon search for alternative offers has to respond to the proposer s offer by the deadline Taking into account the responder s reaction the proposer s optimal strategy can vary from an exploding offer an offer that has to be accepted or rejected on the spot to an offer with extended deadline under different market conditions proxied by characteristics of the alternative offer distribution In particular the proposer should offer an exploding offer when the alternative offer market is unfavorable to the responder and the harsher it is the smaller the offer size On the other hand when the alternative offer market is favorable to the responder the proposer can benefit from making a smaller compared to the exploding offer non exploding offer and the more favorable the market the smaller the offer size and the longer the deadline Our analysis is further extended to the case where the responder has private knowledge of the alternative offers arrival rate and we characterize the optimal strategy for the proposer when she either makes a single offer or a menu of offers that serves as a self selection mechanism In the latter case the optimal menu of offers can be implemented as a sign up bonus type of contract

Size Matters, Book Value Does Not! The Fama-French Empirical CAPM Revisited Marie Lambert,2015 The Fama and French F F factors do not reliably estimate the size and book to market effects Our paper shows that the former has been underestimated in the US market while the latter overestimated We do so by replacing F F s independent rankings by the conditional ones introduced by Lambert and Hubner 2013 over which we

improve the sorting procedure This new specification better reflects the properties of the individual risk premiums We emphasize a much stronger size effect than conventionally documented As a major related outcome the alternative risk factors deliver less specification errors when used to price passive investment indices **Size Matters** Judy
