Music as Philosophy Michael Spitzer, 2021-08-31 Beethoven s late style is the language of his ninth symphony the Missa Solemnis the last piano sonatas and string quartets the Diabelli Variations the Bagatelles as well as five piano sonatas five string quartets and several smaller piano works Historically these works are seen as forging a bridge between the Classical and Romantic traditions in terms of their musical structure they continue to be regarded as revolutionary Spitzer s book examines these late works in light of the musical and philosophical writings of the German intellectual Theodor Adorno and in so doing attempts to reconcile the conflicting approaches of musical semiotics and critical theory He draws from various approaches to musical linguistic and aesthetic meaning relating Adorno to such writers as Derrida Benjamin and Habermas as well as contemporary music theorists Through analyses of Beethoven s use of specific musical techniques including neo Baroque fugues and counterpoint Spitzer suggests that the composer s last works offer a philosophical and musical critique of the Enlightenment and in doing so created the musical language of premodernism

The Beethoven Syndrome Mark Evan Bonds, 2019 The Beethoven Syndrome is the inclination of listeners to hear music as the projection of a composer s inner self This was a radically new way of listening that emerged only after Beethoven s death Beethoven s music was a catalyst for this change but only in retrospect for it was not until after his death that listeners began to hear composers in general and not just Beethoven in their works particularly

in their instrumental music The Beethoven Syndrome Hearing Music as Autobiography traces the rise fall and persistence of this mode of listening from the middle of the eighteenth century to the present Prior to 1830 composers and audiences alike operated within a framework of rhetoric in which the burden of intelligibility lay squarely on the composer whose task it was to move listeners in a calculated way But through a confluence of musical philosophical social and economic changes the paradigm of expressive objectivity gave way to one of subjectivity in the years around 1830 The framework of rhetoric thus yielded to a framework of hermeneutics concert goers no longer perceived composers as orators but as oracles to be deciphered In the wake of World War I however the aesthetics of New Objectivity marked a return not only to certain stylistic features of eighteenth century music but to the earlier concept of expression itself Objectivity would go on to become the cornerstone of the high modernist aesthetic that dominated the century s middle decades Masterfully citing a broad array of source material from composers critics theorists and philosophers Mark Evan Bonds s engaging study reveals how perceptions of subjective expression have endured leading to the present era of mixed and often conflicting paradigms of listening
