The Prosody of Mandarin Chinese Xiao-nan Susan Shen,1990-01-01 Through acoustic analysis of Mandarin Chinese intonation the author finds that the intonation baseline moves up when intonation is shifted from assertive to interrogative therefore two baselines and two intonation layers must be reckoned with Sentence intonation affects the tonal values and the tonal shapes of intrinsic lexical tones though not beyond recognition Tonal changes prove to be closely related to sentence intonation which is superimposed simultaneously onto the utterance as a whole The author s findings support the position of the movability of the intonation baseline and rectify some widely spread traditional claims concerning Mandarin Chinese prosody

Surviving Through the Days Herbert W. Luthin, 2002-06-26 This anthology of treasures from the oral literature of Native California assembled by an editor admirably sensitive to language culture and history will delight scholars and general readers alike. Herbert Luthin's generous selection of stories, anecdotes, myths, reminiscences, and songs is drawn from a wide sampling of California's many Native cultures and although a few pieces are familiar classics, most are published here for the first time in fresh literary translations. The translators, whether professional linguists or Native scholars and storytellers, are all acknowledged experts in their respective languages and their introductions to each selection provide welcome cultural and biographical context. Augmenting and enhancing the book are Luthin's engaging, informative essays on topics that range from California's Native languages and oral literary traditions to critical issues in performance translation and the history of California literary ethnography.
