Developing Writing Skills David James, 2016-11-12 This book aims to broaden the reader's interest in language as an essentially human activity and as an art form However it is less concerned with encouraging creative writers than in sharpening sensitivity to the billions of words and word combinations that surround us Of the four language skills listening speaking reading and writing writing is the most difficult It is also the skill by which we are often judged by others as worthy to proceed to higher learning say or to be interviewed for a post of special responsibility It is the sector that causes most anxiety for pupils and parents As an essentially self help guide this book may be used as a supplement to regular classes however it is predominantly a stand alone manual that eschews regular drills and places the onus on the student to question our use of written and spoken words Each of the 60 or so one page chapters simply outlines the topic and follows this with a To Do section with no answers The student will realise that language is arbitrary and that he/she is the final judge *Developing Writing Skills* is not merely about getting you through exams but encouraging an interest in language for life It is a practical book but not a grammar book it encourages you to read widely and choose your words with care to expand your word store to write continually and self critically and learn to take a pride in a sentence Students may look askance at the latter because schools are essentially market orientated encouraging performance through various stages and obsessed by league tables and university places Life does not begin with a first class honours degree and end with a career as a heart surgeon or a barrister it begins and ends with an attempt to grapple with language sounds and later its accompanying marks on paper rather than marks in a teacher's record book
