Adventures in Yiddishland Jeffrey Shandler, 2006 Shandler takes a wide ranging look at Yiddish culture including language learning literary translation performance and material culture He examines children s books board games summer camps klezmer music cultural festivals language clubs Web sites cartoons and collectibles all touchstones of the meaning of Yiddish as it enters its second millennium Rather than mourn the language s demise *Adventures in Yiddishland* calls for taking an expansive approach to the possibilities for the future of Yiddish Shandler s conceptualization of postvernacularity sheds important new light on contemporary Jewish culture generally and offers insights into theorizing the relation between language and culture **BOOK JACKET**

The Theory of Electrons and Its Applications to the Phenomena of Light and Radiant Heat Hendrik Antoon Lorentz, 1916 *Theory and Calculation of Alternating Current Phenomena* Charles Proteus Steinmetz, Ernst Julius Berg, 1897 *Theory and Calculation of Alternating Current Phenomena* by Charles Proteus Steinmetz first published in 1900 is a rare manuscript the original residing in one of the great libraries of the world This book is a reproduction of that original which has been scanned and cleaned by state of the art publishing tools for better readability and enhanced appreciation Restoration Editors mission is to bring long out of print manuscripts back to life Some smudges annotations or unclear text may still exist due to permanent damage to the original work We believe the literary significance of the text justifies offering this reproduction allowing a new generation to appreciate it

The Course in Buddhist Reasoning and Debate Daniel E. Perdue, 2014-05-27 Buddhism is a wisdom tradition It asserts that we are liberated by the power of our own understanding The three purposes of Buddhist debate are to defeat your own and others misconceptions to establish your own correct view and to clear away objections to your view It is like the approach of a physician to remove what does not belong and to strengthen what does Thus for Buddhists reasoning and debate are not ends in themselves or idle intellectual speculation Rather they are used as one path to spiritual wellness taking practitioners closer to the health of liberation through these efforts to remove mistaken views and to understand and strengthen correct ones Reading and memorization are not enough Students must be able to verbalize their understanding and defend it under the pressure of cross examination This book teaches the basic analytical skills and procedures used in Buddhist debate It is based on the author s own practice and experiences gained in the debating courtyards of Tibetan monasteries in India and matured through years of leading popular university courses on the subject Sample debate exchanges show readers how to get started with the Buddhist style of analytical thinking to challenge and defend assertions Learning is supported by guided reflections practical advice and verbal exercises to be completed in practice with a partner By the end of the course readers will be able to engage in unscripted full fledged debates with a qualified partner about Buddhist characterizations and classifications of phenomena using the format and procedures of Buddhist debate Moreover these skills once mastered can then be applied to investigating the truth and falsity of views in any other subject

Chemical Engineering Kohei Ogawa, 2007-11-26

Chemical engineering has often been referred to as a study in methodology Approaches in chemical engineering are determined by individual phenomena processes and each of these are studied individually The phenomena that are treated in chemical engineering can be classified into two groups 1 phenomena that are definite and can be expressed by formulas such as differential equations 2 phenomena that can be expressed only by probability terms The focus of Chemical Engineering A new Perspective is on information entropy The main themes covered are mixing separation turbulent structure particle size distribution and degree of uncertainty The book recognizes that the information entropy may not be the only viewpoint and how the degree of information entropy is useful for the other phenomena Introduction of information entropy to chemical engineering Assertion of the significance of a consistent viewpoint Presenting new information about phenomena that can be treated by probability terms

Multivariate Calibration Harald Martens, Tormod Næs, 1992-08-07 Multivariate Calibration Harald Martens Chemist Norwegian Food Research Institute Aas Norway and Norwegian Computing Center Oslo Norway Tormod Næs Statistician Norwegian Food Research Institute Aas Norway The aim of this interdisciplinary book is to present an up to date view of multivariate calibration of analytical instruments for use in research development and routine laboratory and process operation The book is intended to show practitioners in chemistry and technology how to extract the quantitative and understandable information embedded in non selective overwhelming and apparently useless measurements by multivariate data analysis Multivariate calibration is the process of learning how to combine data from several channels in order to overcome selectivity problems gain new insight and allow automatic outlier detection Multivariate calibration is the basis for the present success of high speed Near Infrared NIR diffuse spectroscopy of intact samples But the technique is very general it has shown similar advantages in for instance UV Vis and IR spectrophotometry transmittance reflectance and fluorescence for x ray diffraction NMR MS thermal analysis chromatography GC HPLC and for electrophoresis and image analysis tomography microscopy as well as other techniques The book is written at two levels the main level is structured as a tutorial on the practical use of multivariate calibration techniques It is intended for university courses and self study for chemists and technologists giving one complete and versatile approach based mainly on data compression methodology in self modelling PLS regression with considerations of experimental design data pre processing and model validation A second more methodological level is intended for statisticians and specialists in chemometrics It compares several alternative calibration methods validation approaches and ways to optimize the models The book also outlines some cognitive changes needed in analytical chemistry and suggests ways to overcome some communication problems between statistics and chemistry and technology

Ultrafast Phenomena in Semiconductors, 1994 **What Kind of Creatures Are We?** Noam Chomsky, 2015-12-15 The renowned philosopher and political theorist presents a summation of his influential work in this series of Columbia University lectures A pioneer in the fields of modern linguistics and cognitive science Noam Chomsky is also one of the most avidly read political theorist of our time In this series of lectures Chomsky presents more than half a

century of philosophical reflection on all three of these areas In precise yet accessible language Chomsky elaborates on the scientific study of language sketching how his own work has implications for the origins of language the close relations that language bears to thought its eventual biological basis He expounds and criticizes many alternative theories such as those that emphasize the social the communicative and the referential aspects of language He also investigates the apparent scope and limits of human cognitive capacities Moving from language and mind to society and politics Chomsky concludes with a philosophical defense of a position he describes as libertarian socialism tracing its links to anarchism and the ideas of John Dewey and even briefly to the ideas of Karl Marx and John Stuart Mill Demonstrating its conceptual growth out of our historical past he also shows its urgent relation to our present moment *Applied X-rays* George Lindenberg Clark,1927
