X Syntax Ray Jackendoff, 1981 **X syntax** Ray S. Jackendoff, 1987 **Views on Phrase Structure** K. Leffel, Denis Bouchard, 2012-12-06

O PRELIMINARY REMARKS Initial drafts of the papers in this collection were presented in a conference entitled Views on Phrase Structure held at the University of Florida Gainesville in March 1989 Eleven of the twenty three participants in the conference were able to contribute to this volume The purpose of the conference was to explore theories of phrase structure in their relation to other subsystems of grammar and or systems of nonlinguistic knowledge Some of the grammatical subsystems which the authors consider are theta theory movement Case and binding a number of papers address how the conceptual system and or aspects of language use may interact Unifying the various approaches and perspectives is an attempt to furnish hypotheses concerning principles of phrase structure with some sort of independent justification

1 PHRASE STRUCTURE THEORY A BRIEF HISTORY A basic outline for a theory of phrase structure theory is accepted by all of the authors here it is known as X bar theory The concepts of X bar theory are expressed in some form by a number of pre generative linguists For example Bloomfield 1933 contrasted endocentric structures such as noun phrases and verb phrases with those he considered exocentric e g prepositional phrases and clauses Jespersen 1933 while presenting a functional system of description in terms of ranks where rank one is nominal for example clarified the relations among the head of a phrase its modifier and a phrase which modifies the modifier

Phrase Structure and the Lexicon J. Rooryck, Laurie Zaring, 1996 The relation between phrase structure and the lexicon has always been an area of prime concern in syntactic theory but never more so than in the recently developed minimalist framework where the lexicon is largely reduced to configurational and computational properties of the grammar Taking this perspective as their point of departure the authors of this volume address issues including the mapping between thematic information and phrase structure the way in which the configurational character of functional categories determines interpretation in a theory of phrase structure and methodological discussions about core assumptions of phrase structure itself Some of the essential themes that emerge are that projection and interpretation go hand in hand a successful projection in an interpretable one and that to a large extent phrase structure itself encodes lexical information and determines interpretation in the thematic domain Audience Theoreticians in syntax semantics and language acquisition and in related fields

Japanese Sentence Processing Reiko Mazuka, Noriko Nagai, 2013-05-13 This volume is a direct result of the International Symposium on Japanese Sentence Processing held at Duke University The symposium provided the first opportunity for researchers in three disciplinary areas from both Japan and the United States to participate in a conference where they could discuss issues concerning Japanese syntactic processing The goals of the symposium were three fold to illuminate the mechanisms of Japanese sentence processing from the viewpoints of linguistics psycholinguistics and computer science to synthesize findings about the mechanisms of Japanese sentence processing by researchers in these three fields in Japan and the United States to lay

foundations for future interdisciplinary research in Japanese sentence processing as well as international collaborations between researchers in Japan and the United States The chapters in this volume have been written from the points of view of three different disciplines with various immediate objectives from building usable speech understanding systems to investigating the nature of competence grammars for natural languages All of the papers share the long term goal of understanding the nature of human language processing mechanisms The book is concerned with two central issues the universality of language processing mechanisms and the nature of the relation between the components of linguistic knowledge and language processing This volume demonstrates that interdisciplinary research can be fruitful and provides groundwork for further research in Japanese sentence processing

Introduction to Spanish/English Linguistics Dee L. Eldredge, Liesder Mayea, 2016-01-08 This textbook is for three groups of people involved with Spanish first for the students enrolled in Spanish English linguistics courses second for college and university librarians and third for every Spanish language teacher professor We suggest that those who have courses of this type consider this book as a text for those classes For those that do not have them we recommend that you offer them and use this book We also believe that it would also be an ideal book for libraries in which people interested in the topic can go to find out information since there are no available texts as comprehensive as this one It is also a book that all Spanish teachers professors should have on their desks and shelves for reference purposes being that it contains a lot of information about linguistics and grammar

Journal of Linguistic Research, 1981 Case, Referentiality and Phrase Structure Balk?z Öztürk, 2005-04-26 This book proposes that the two independent conditions on argumenthood namely case and referentiality are strongly correlated and have to be associated with each other in syntax as syntactic features It shows that languages exhibit variation in the way this association is implemented in their syntax which presents an explanation for the differences observed in their phrase structure in terms of non configurationality Thus this book not only presents an innovative overarching theory for case and referentiality but also aims to bring a new look at the issues of non configurationality It specifically argues for parameterization of functional categories associated with case and referentiality which has certain implications not only for the acquisition but also for the diachronic development of functional categories Providing rich comparative data from typologically different languages such as Turkish Chinese Hungarian English and Japanese this book is of particular interest to typologists as well
